

BREW · SCALE WITH BREW · 72-SECOND LAUNCH FILM

From idea to upload, without the production in between.

72 S · 16:9 MASTER (9:16 CUTDOWN LATER) · 29 FRAMES · 6 ACTS · 24 FPS

WHAT THE VIEWER SHOULD REMEMBER, IN ORDER

- 01 brew makes the whole video for you.
- 02 AI does the heavy lifting. A person watches every frame.
- 03 YouTube videos, AI b-roll and UGC ads.
- 04 You approve. You don't assemble.
- 05 Your first video is free.

BUILT FROM

The product brief and scalewithbrew.com, captured 1 Oct 2026. Colours, type, easing curves, the viewfinder brackets, the pipeline pills and most on-screen copy are lifted from the live site so the film looks and sounds like brew.

Corrected from the brief: the nine languages are EN DE FR ES PT IT PL ID DA (no Hindi or Korean). Added the free first video CTA and the "Rose Freedman" proof moment from the site.

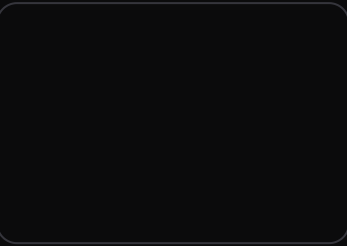

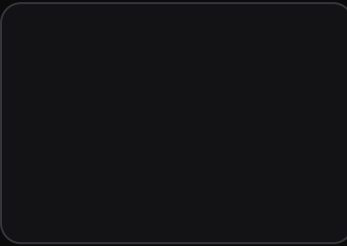

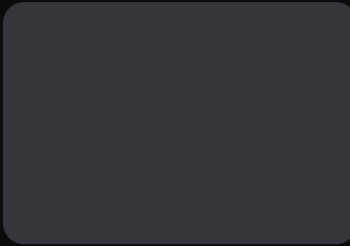

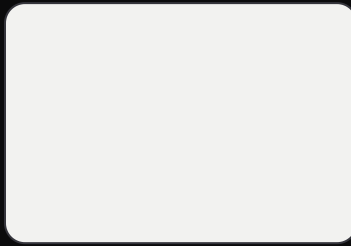

Voiceover

Tone: confident, conversational, dry. Not hyped. British spelling on screen. Roughly 115 words, read at ~140 wpm with the deliberate pause on the freeze.

TIME	VOICEOVER	ON SCREEN
0:00	Making one video is easy.	Making one video is easy.
0:03	Making fifty — week after week — is another story.	Making fifty is another story.
0:05	(silence)	freeze
0:07	So hand it over.	
0:09	We make the whole video.	brew · We make the whole video.
0:11	Send a topic, or a script. We research it, write it, voice it, source every shot, and cut it.	TOPIC → RESEARCH → SCRIPT → VOICE → EDIT
0:25	Then a person watches all of it.	Review · frame by frame
0:27	An AI tool picks on mood. We find her.	What tools make. What we make.
0:31	Every frame, before you ever see it.	Every frame watched by a person.
0:34	Long-form YouTube, up to sixty minutes. Three days, start to finish.	YouTube videos, done for you. · A file, not a first draft.
0:43	Need a shot that doesn't exist? Type it. Download it in minutes.	AI b-roll, on demand. · Type the shot. Keep the shot.
0:49	Ads that look shot, not generated. Hooks, demos and payoffs, at the volume you actually test.	Vertical ads that look shot, not generated.
0:56	And when a video works, upload it nine times, not once.	Upload it nine times, not once.
1:02	Even the thumbnail is drawn by a person.	Drawn by a person
1:05	You don't manage any of that.	Send us a script →
1:07	You approve. You don't assemble.	You approve. You don't assemble.
1:09	Your first video is free. brew.	Your first video is free. scalewithbrew.com

Style & motion

PALETTE (FROM SCALEWITHBREW.COM)

								
Ground	Surface	Line	Text	Text 3	Brand green	YouTube	AI b-roll	UGC
#0B0B0C	#131316	#35353C	#F2F2F0	#8A8A91	#3EAF75	#D9A441	#3FB8C4	#E2634A

Green is reserved for brew moments, active states and success. Amber, teal and coral appear only inside their product scenes, exactly as the site colour-codes them.

TYPE

We make the whole video.

Bricolage Grotesque 500–800 · headlines, tight tracking (–2 to –5)

Archivo 400–600 · UI text, captions, body

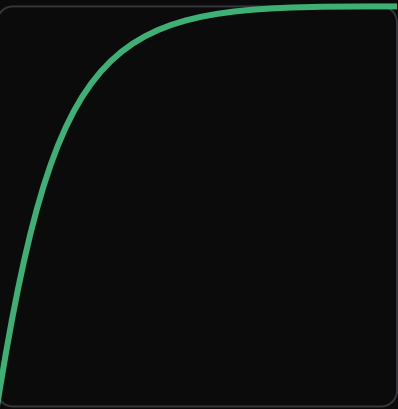

IBM PLEX MONO 500 · LABELS · TIMECODE 00:00:33:00

SIGNATURE DEVICE: THE VIEWFINDER

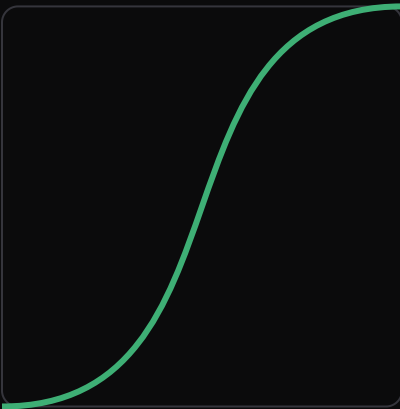

The four green corners from brew's logo are "a person looking". They frame the chaos, lock onto the right shot, pick the thumbnail frame, and carry the logo.

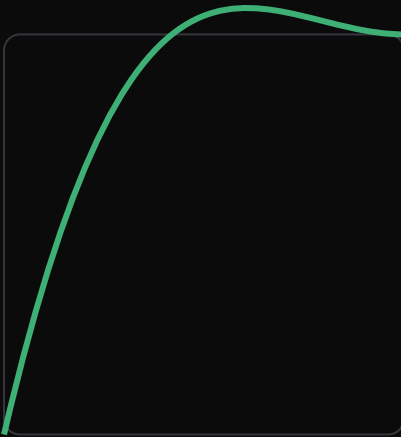

MOTION: EASING FROM THE SITE'S CSS

e-out
.16,1,.3,1
Everything entering

in-out
.65,0,.35,1
Camera moves, compressions

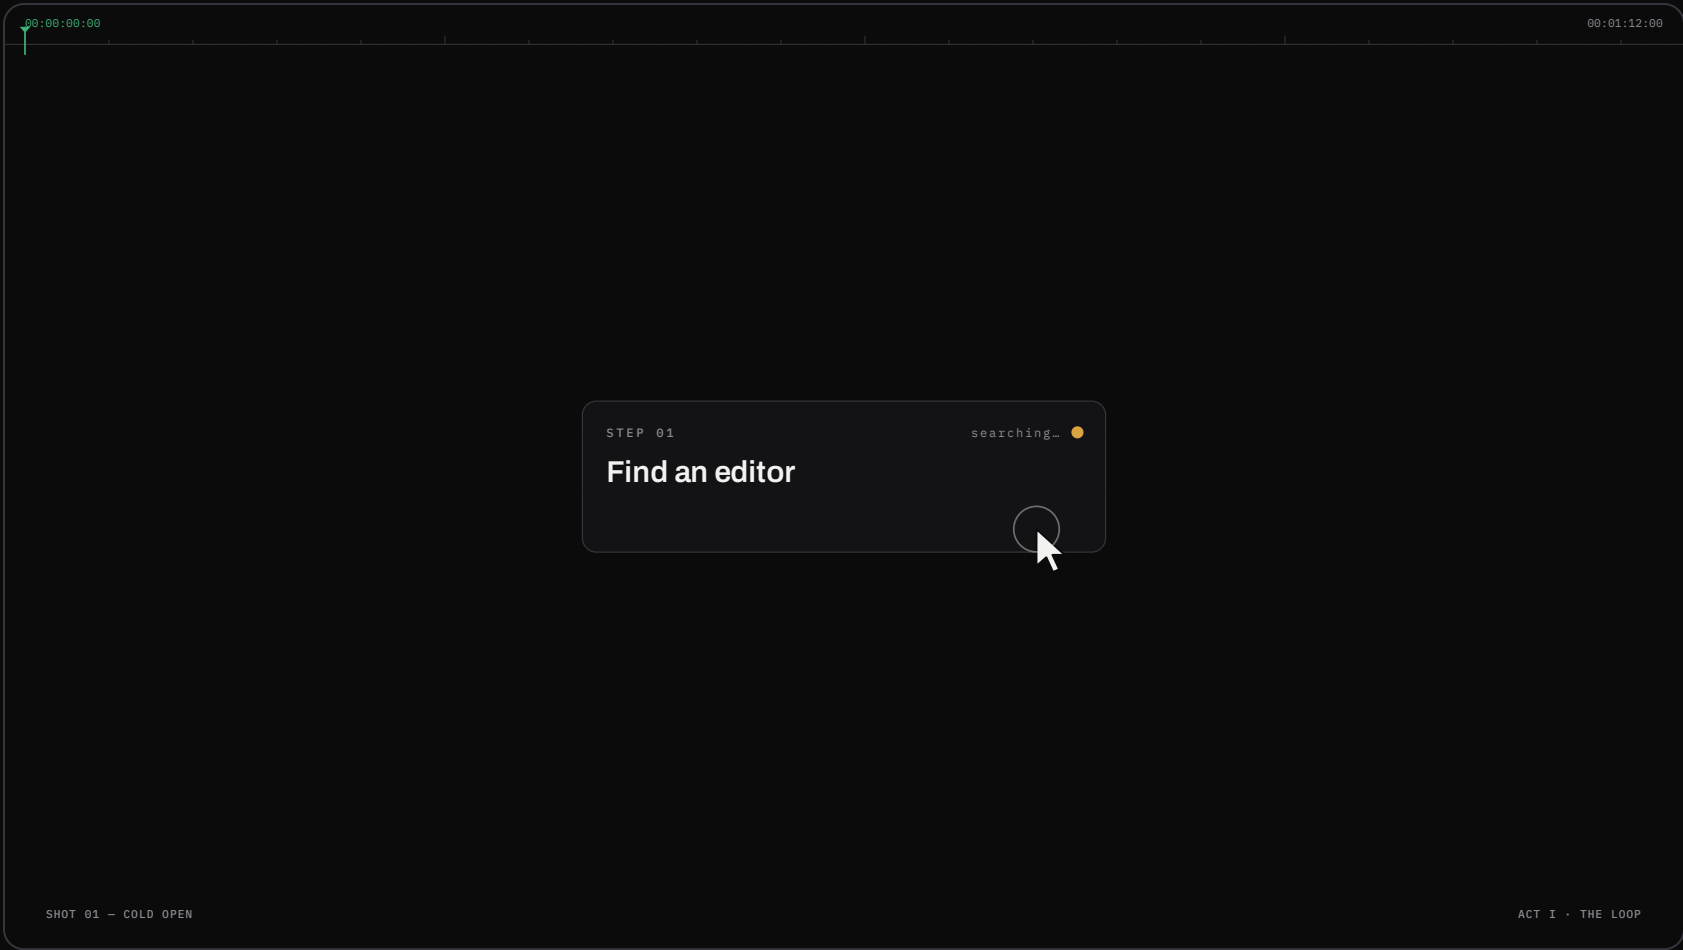

overshoot
.34,1.45,.64,1
Bracket locks, the green "e"

Rhythm: Act I accelerates into chaos, hard freeze, then everything after is smooth, modular and predictable. 40 ms stagger on every list. The only slow-motion is Act IV, where a person reviews, so the slowdown itself means "care".

TRANSITION CHAIN: ONE OBJECT, TRANSFORMED, NEVER CUT

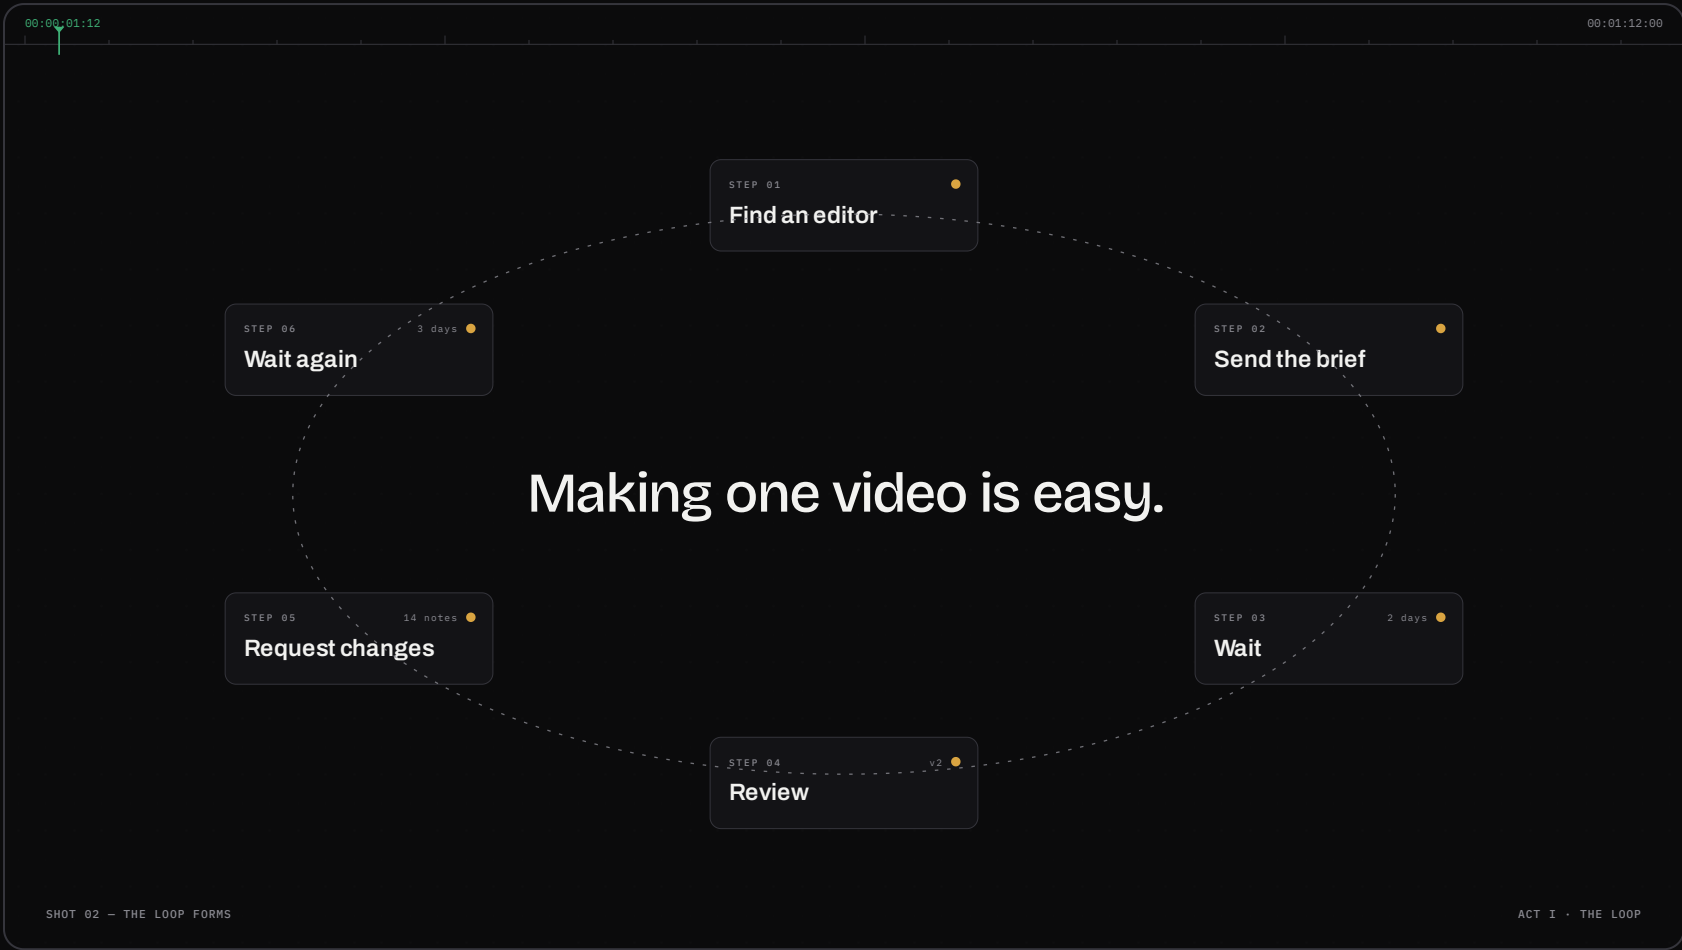

Grain: very light, shifting (site uses grain-shift). Background: ground #0B0B0C with the site's faint 32 px dot grid; diagonal green "aurora rake" only on brand moments (reveal, hero line, end card). No robots, glowing grids, brains or holograms.

01 Cold open

00:00:00:00 · Act I

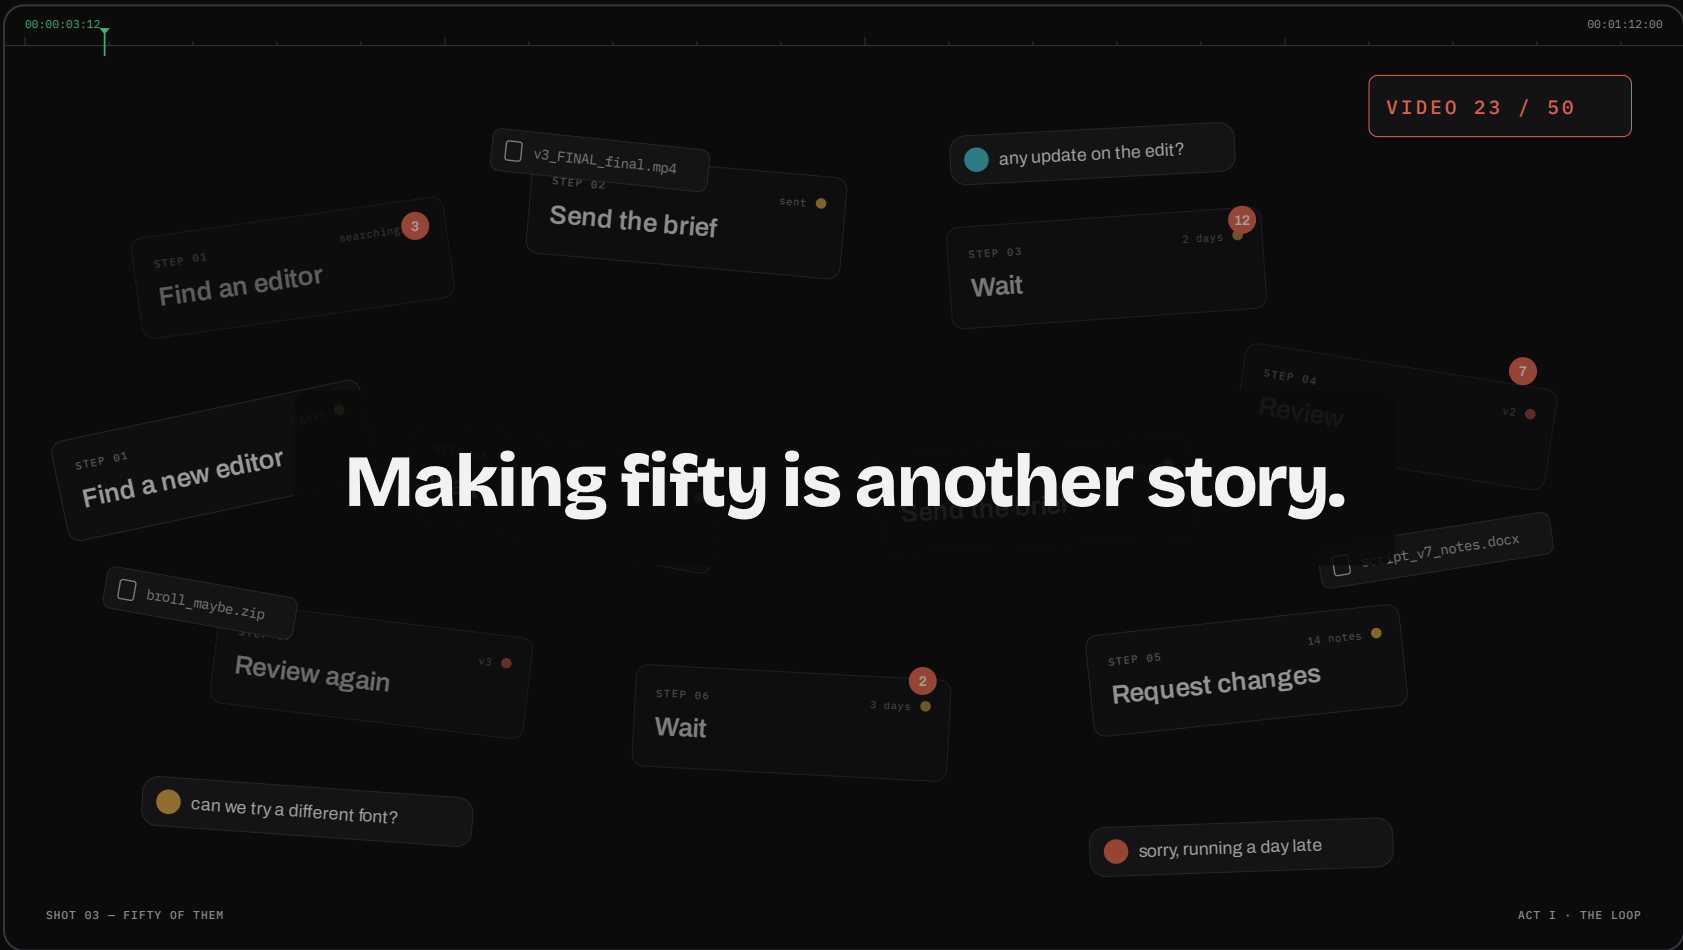

VISUAL	Black. The brand timecode ruler draws across the top. One card lands centre: FIND AN EDITOR, status "searching...". A cursor clicks it.
MOTION	Ruler wipes L → R (e-out, 400ms). Card drops 22px and settles with overshoot. Cursor click = 0.92 scale pop.
VO	"Making one video is easy."
SFX	Room tone, a single trackpad click, keyboard tick.
NEXT	Card flips to reveal the next card behind it; the loop starts.

02 The loop forms

00:00:01:12 · Act I

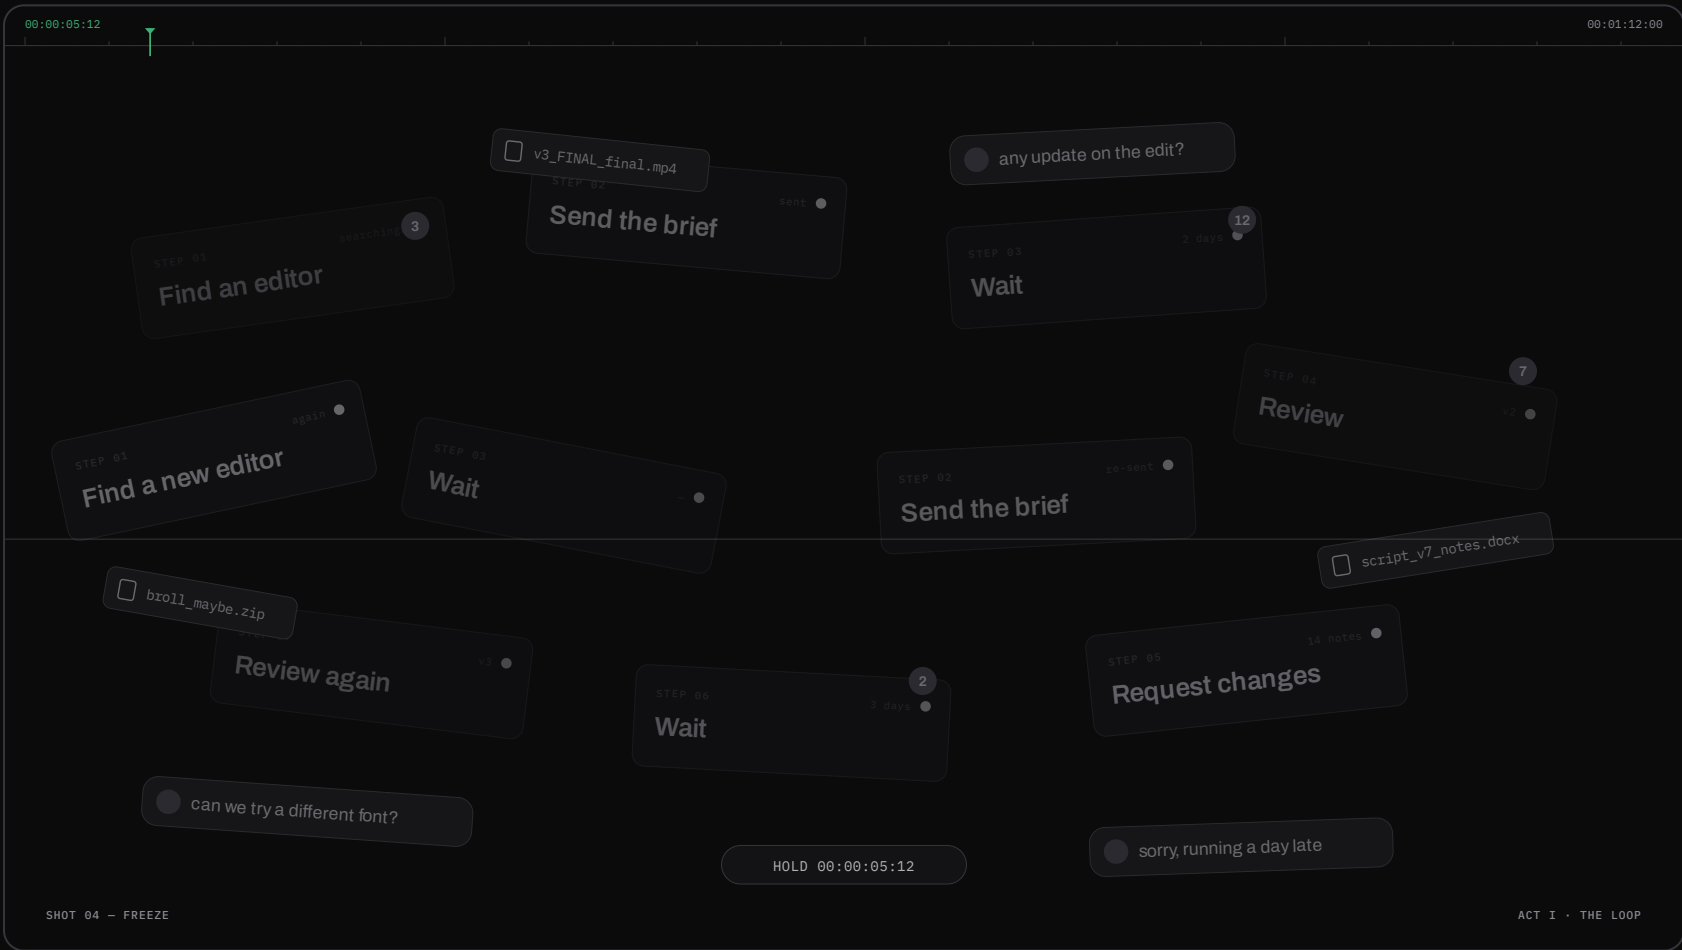

VISUAL	Six cards form a ring: Find an editor → Send the brief → Wait → Review → Request changes → Wait again. Centre super.
MOTION	Cards deal in clockwise, 40ms stagger. The dashed orbit starts rotating slowly; a highlight steps card to card like a clock hand.
VO	(continues) "...one video is easy."
SFX	Each card = soft paper tick, rising pitch.
NEXT	Ring accelerates; cards duplicate off the orbit.

03 Fifty of them

00:00:03:12 · Act I

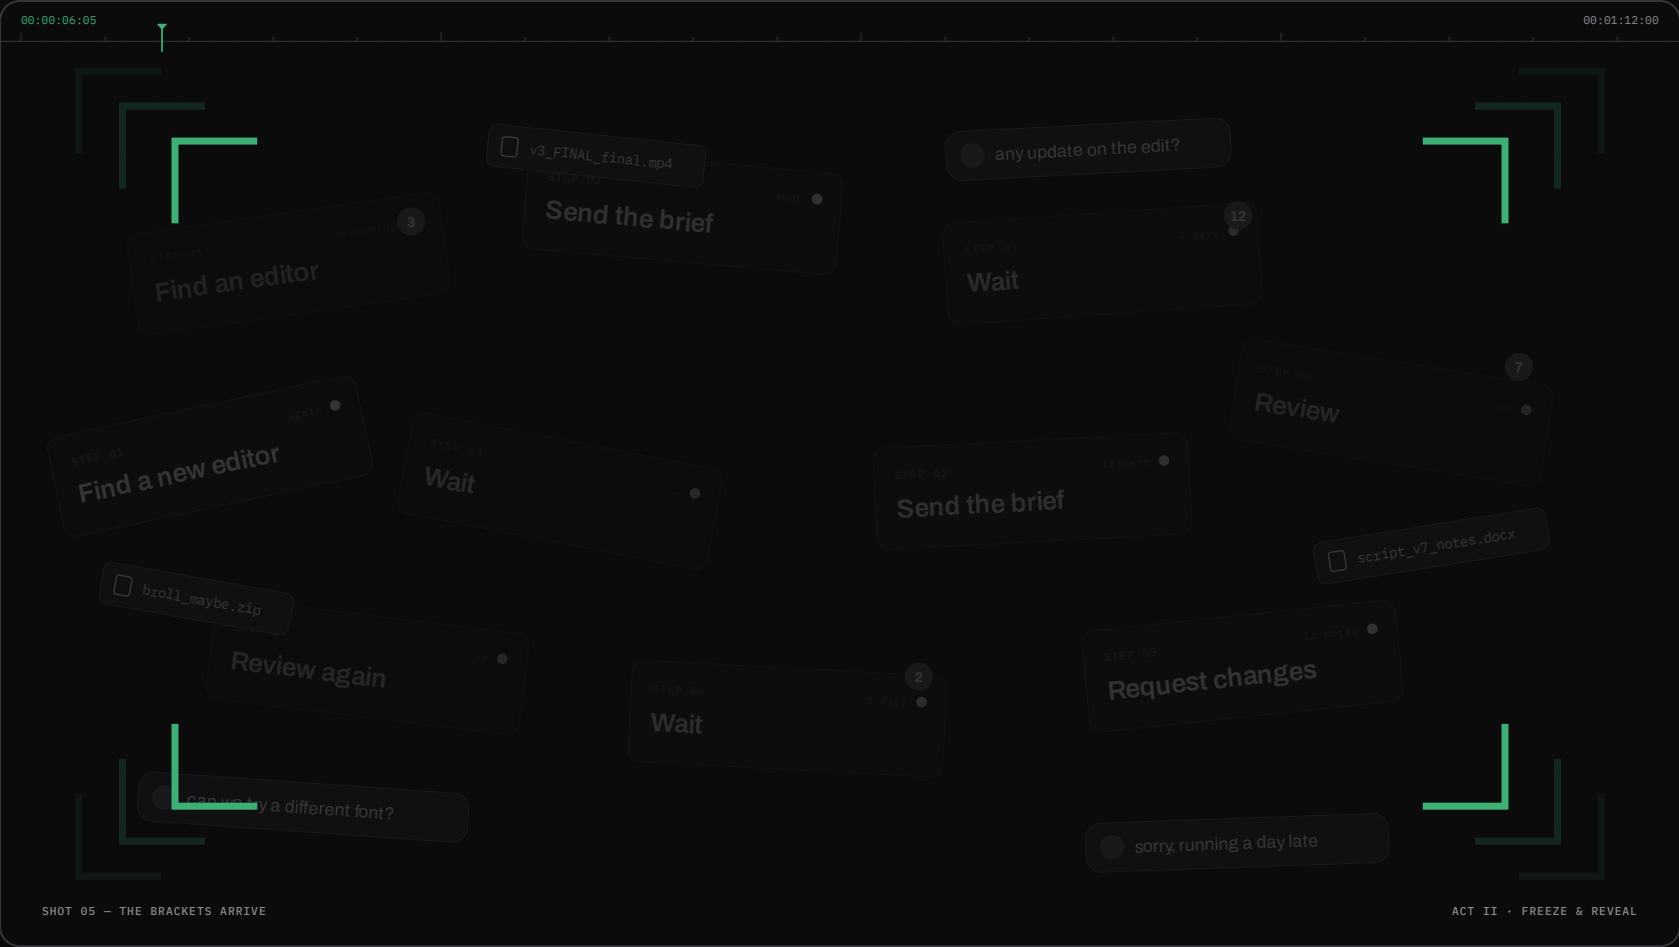

VISUAL	The loop multiplies: cards overlap, messages and files pile in ("any update on the edit?", v3_FINAL_final.mp4). Counter climbs VIDEO 07 → 23 → 50.
MOTION	Speed ramp up. Cards spawn with motion blur and random 4–12° tilt; camera drifts and shakes 2px. Counter rolls digits.
VO	"Making fifty — week after week — is another story."
SFX	Overlapping notifications, Slack pings, error blip, keyboard flurry building.
NEXT	Hard freeze on a single frame.

04 Freeze

00:00:05:12 · Act I

VISUAL	Everything stops mid-air and drains to grey. Only the timecode stays lit, held on one frame.
MOTION	Hard freeze (0 frames ease). Desaturate over 6 frames. A thin scan line passes once.
VO	(silence)
SFX	All sound cuts dead. 600ms of silence; the loudest moment in the film.
NEXT	Green corner brackets enter from the edges of frame.

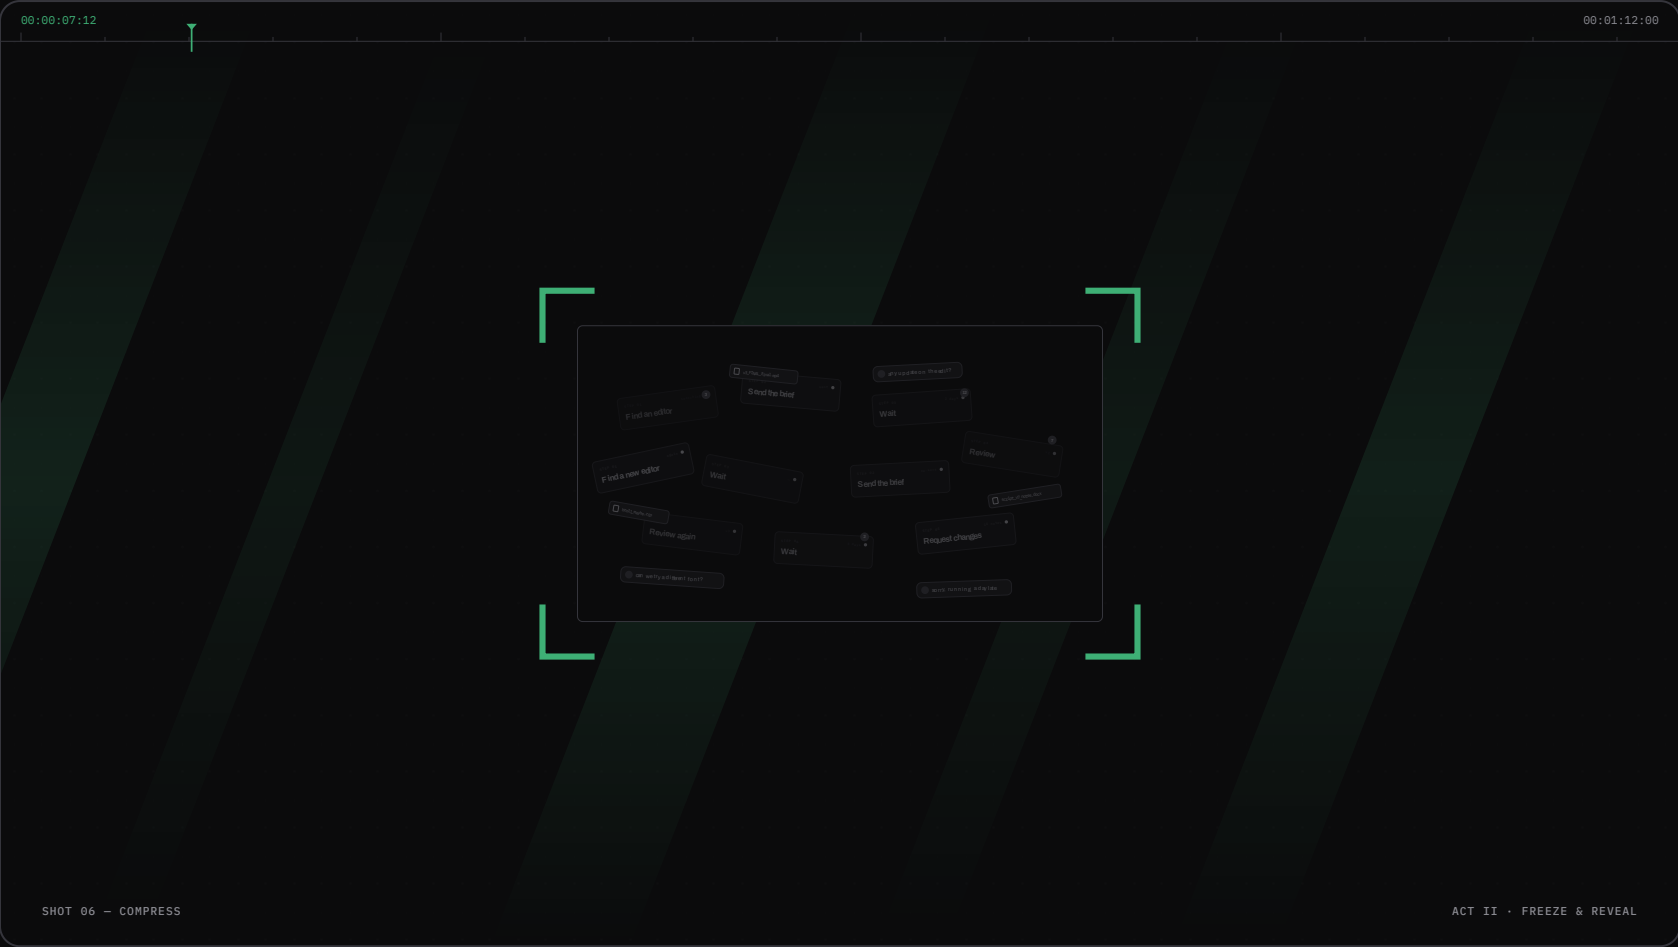

05

The brackets arrive

00:00:06:05 · Act II

VISUAL	The four corners of the brew viewfinder markslide in from the edges and frame the frozen mess.
MOTION	Brackets travel inward on e-out (.16,1,.3,1), 500ms; ghost trails. The frame behind dims to 35%.
VO	(silence)
SFX	One low, clean "thunk" as the brackets land. First sonic hint of the brew signature.
NEXT	Brackets keep closing, compressing everything inside them.

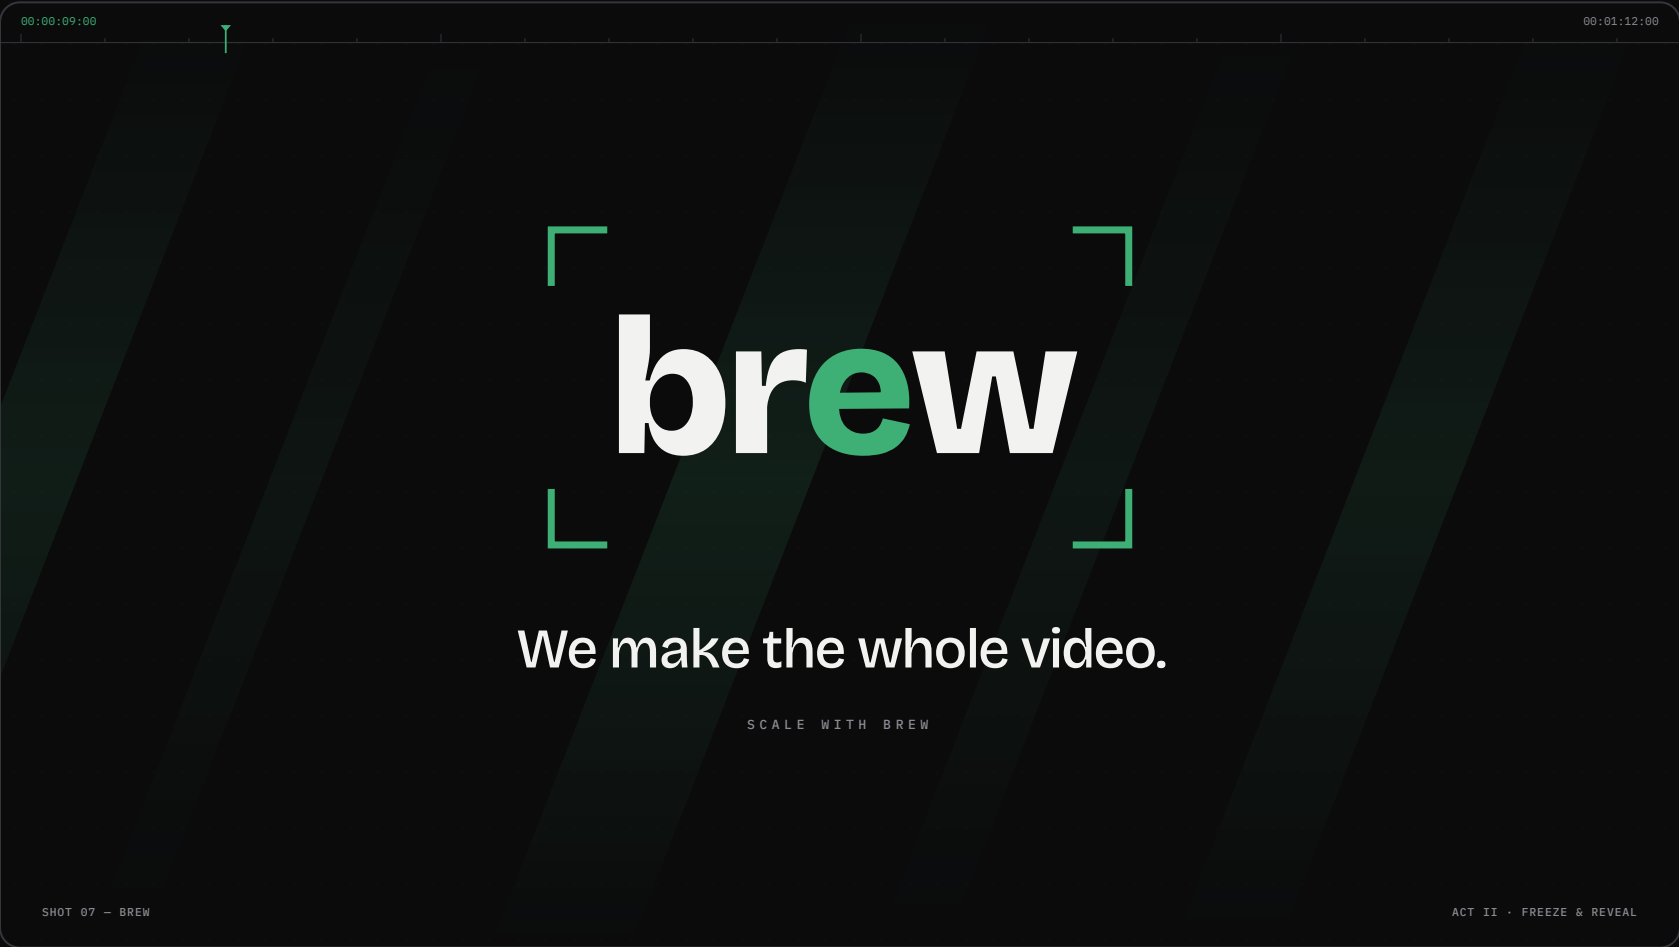

06

Compress

00:00:07:12 · Act II

VISUAL	The brackets squeeze the whole loop into a single small frame. Green light rakes diagonally across the dark.
MOTION	Scale-to-fit with a 1.5s ease-in-out (.65,0,.35,1); the mess inside turns into a clean dark tile. Aurora rake passes L → R.
VO	"So hand it over."
SFX	Air pull / reverse swell into a soft click.
NEXT	The tile flips to the brew wordmark.

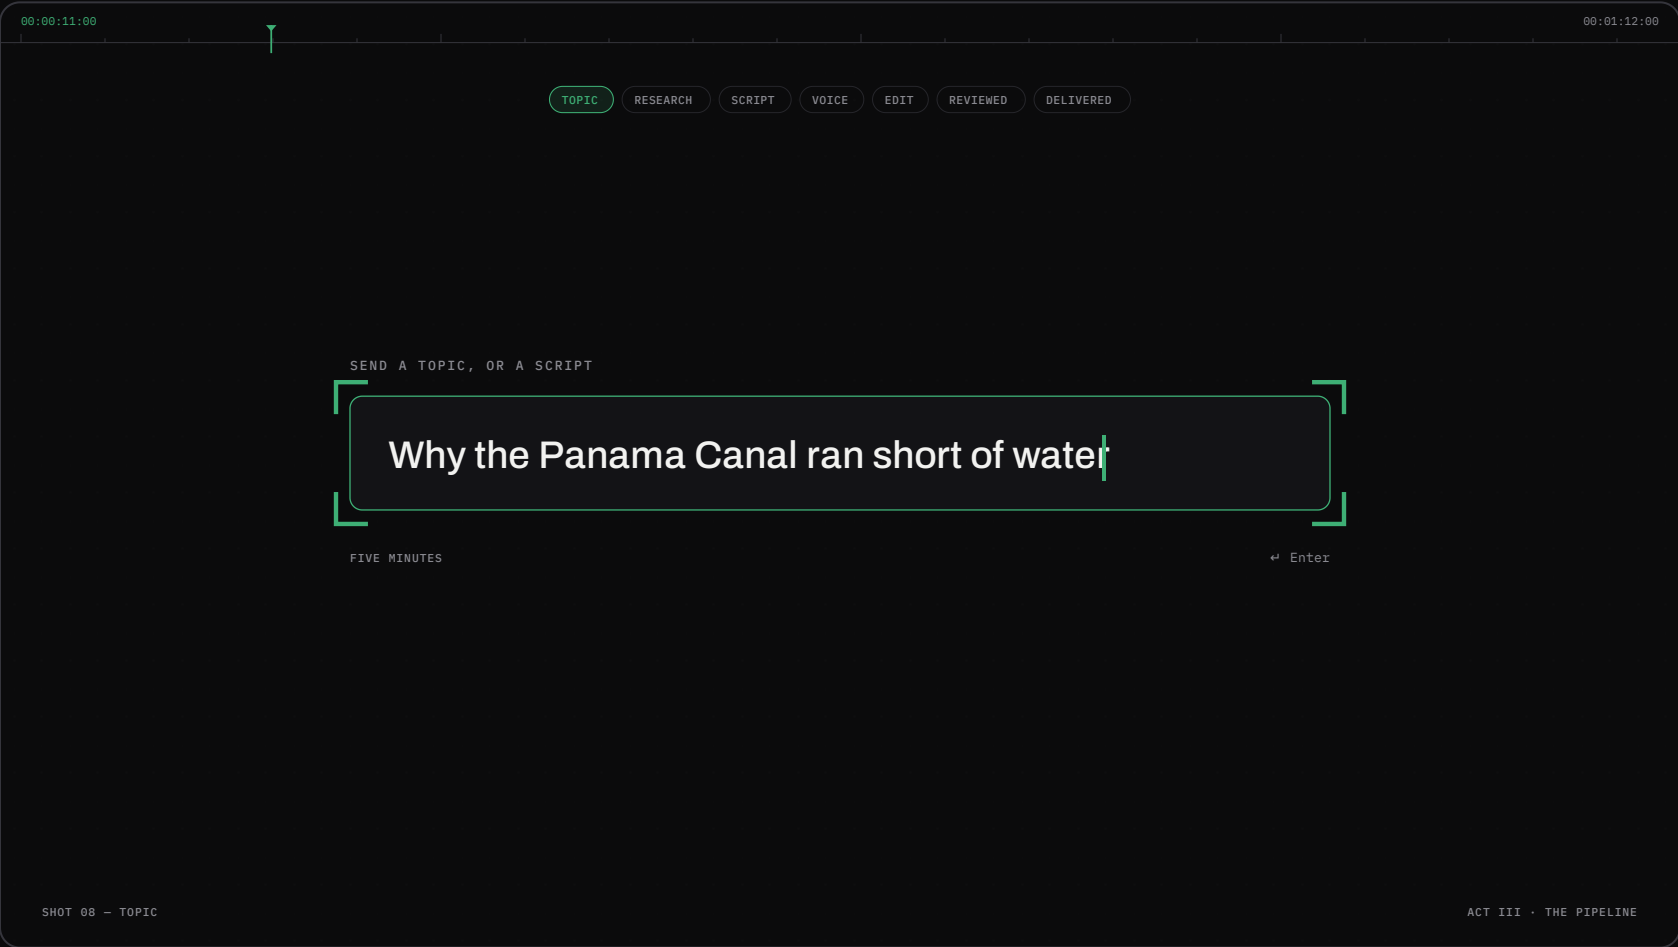

07

brew

00:00:09:00 · Act II

VISUAL	The brew logo: lowercase wordmark, green "e", inside the viewfinder brackets. Super: "We make the whole video."
MOTION	Letters rise through a mask, 40ms stagger; the green "e" lands last with a slight overshoot. Super fades up 22px.
VO	"We make the whole video."
SFX	The brew sonic signature: one warm, rounded synth note.
NEXT	The bracket frame stretches into a text field.

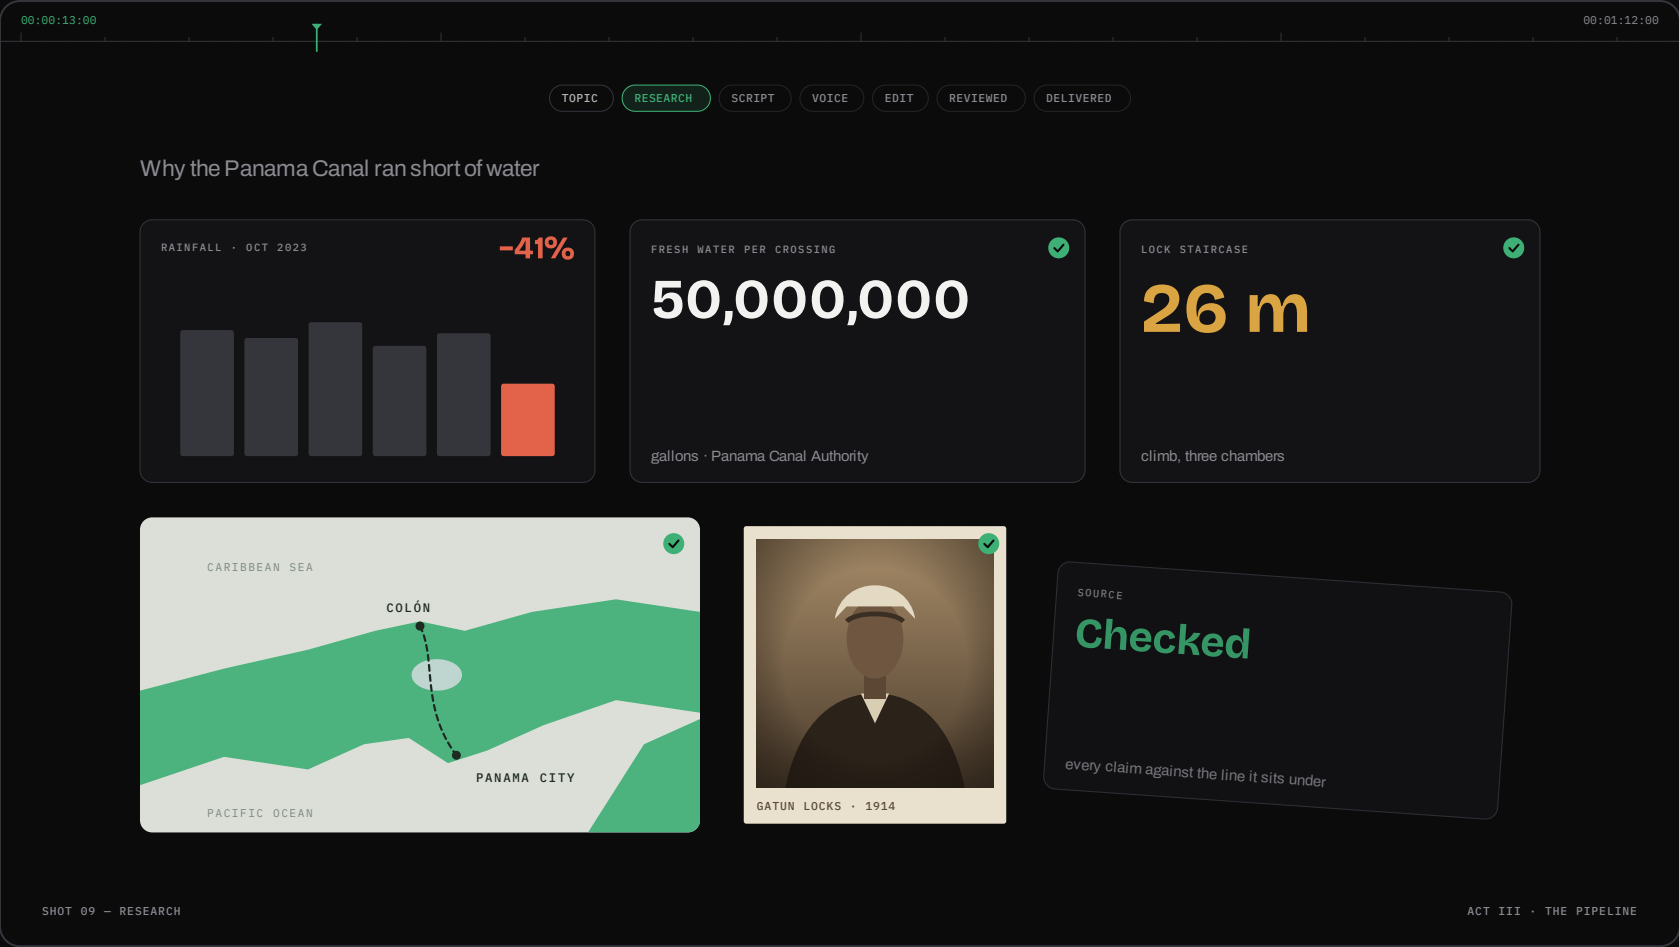

08

Topic

00:00:11:00 · Act III

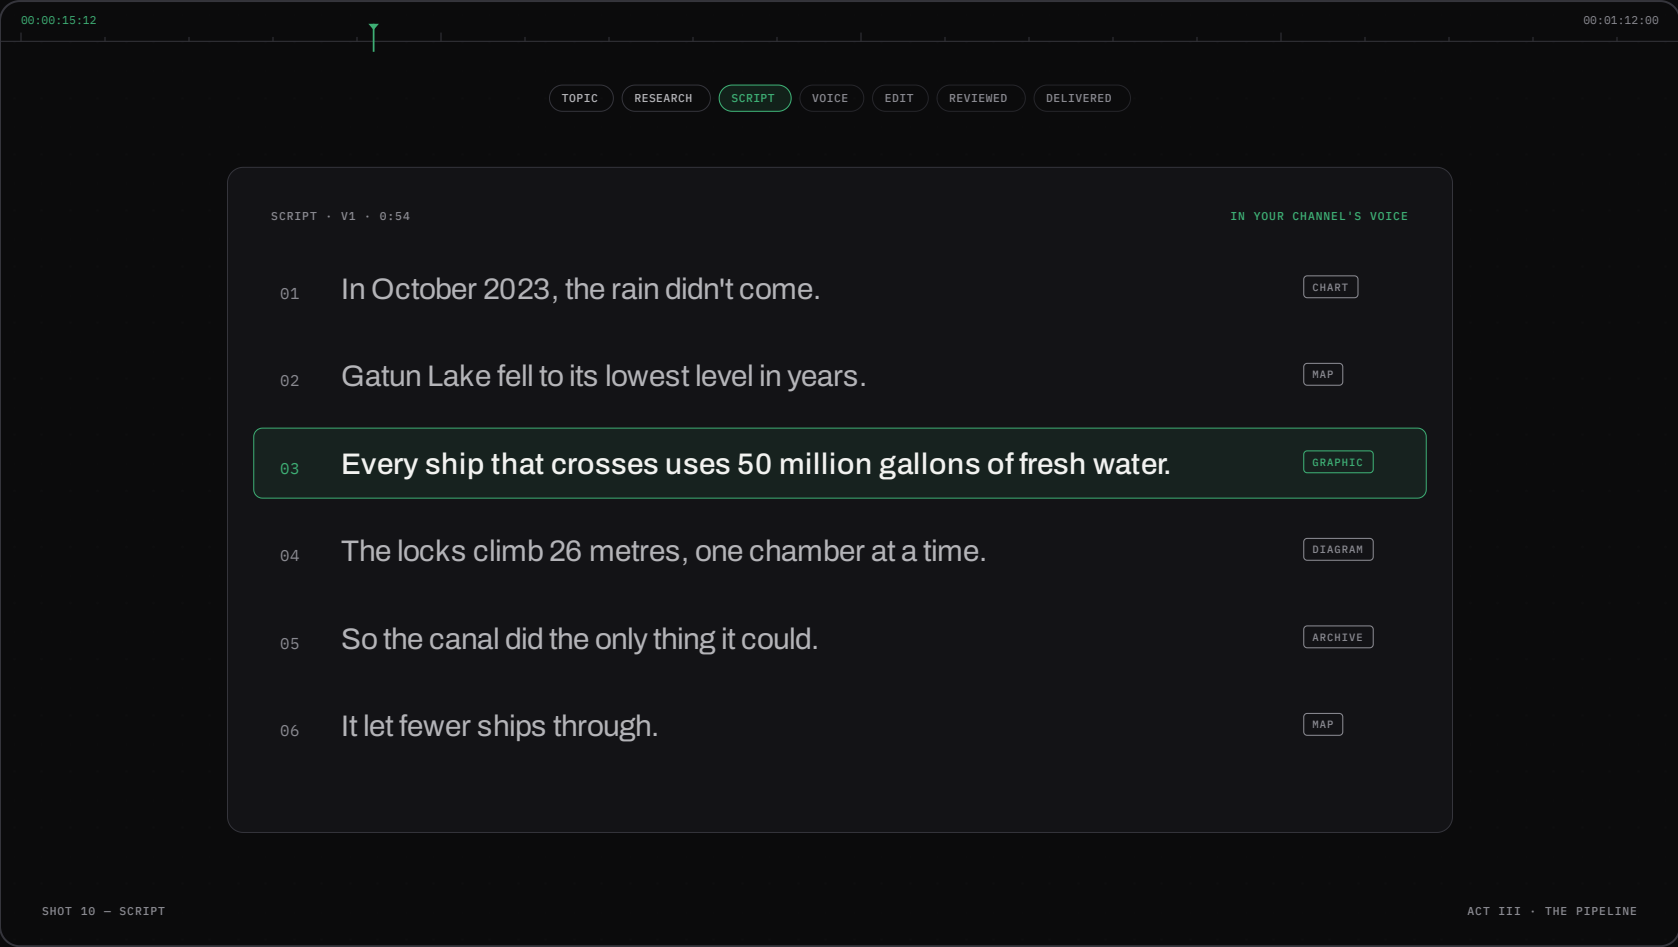

VISUAL	The bracket frame becomes an input. The seven pipeline pills from the site appear top centre; TOPIC is lit. One line gets typed.
MOTION	Bracket corners morph into the field's corners. Typing at ~28 chars/s with a green caret. Pills fade in, 40ms stagger.
VO	"Send a topic, or a script."
SFX	Soft mechanical keys, one per character, low in the mix.
NEXT	Enter → the line splits into source cards.

09 Research

00:00:13:00 · Act III

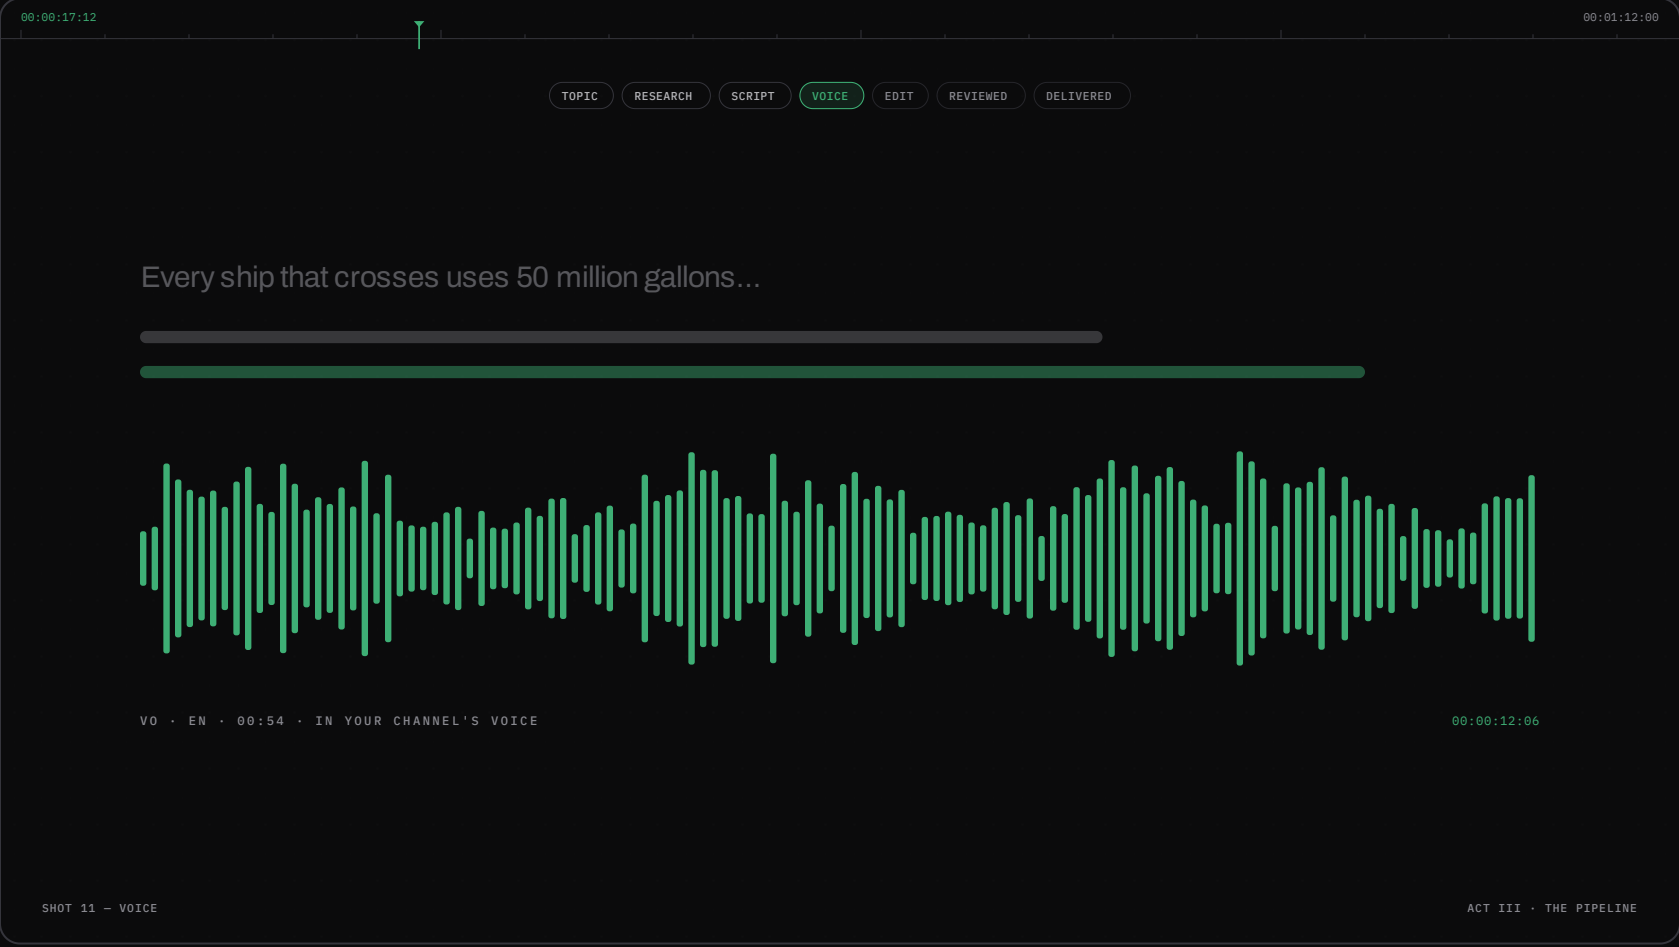

- VISUAL
- The topic line shatters into verified source cards: rainfall –41% (Oct 2023), 50,000,000 gallons a crossing, a 26 m lock climb, a map and an archive print. Each gets a green check.
- MOTION
- Cards fly out from the line along curved paths, rotate to 0° and snap into a grid. Checks pop in 80ms after each lands.
- VO
- "We research it..."
- SFX
- Paper flicks; a small "tick" per verified check.
- NEXT
- Cards collapse into lines of text.

10 Script

00:00:15:12 · Act III

- VISUAL
- Sources collapse into a structured script. Numbered beats; each line tagged with the visual it needs (MAP, CHART, DIAGRAM). Line 03 is highlighted.
- MOTION
- Text lines slide in from the right and lock to a baseline grid. Tags snap on after their line. Highlight bar wipes across line 03.
- VO
- "...write it..."
- SFX
- Typewriter-soft ticks, much quieter than Act I.
- NEXT
- The script lines stretch sideways into a waveform.

11 Voice

00:00:17:12 · Act III

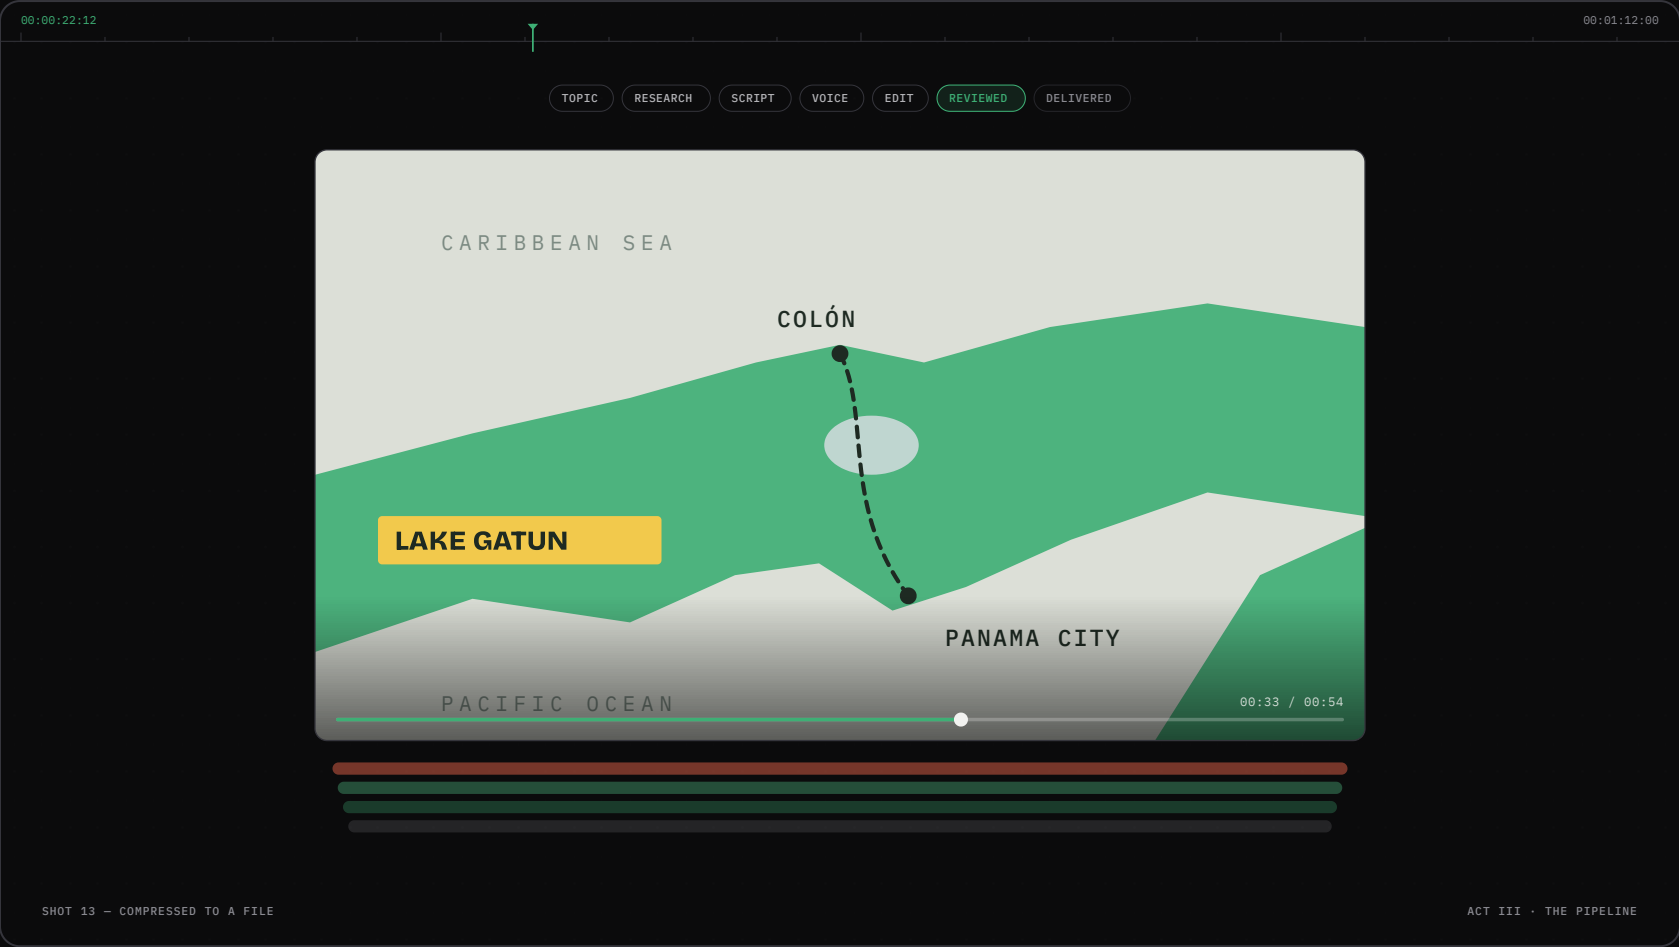

- VISUAL
- The script lines stretch horizontally into bars, and the bars become a green voice waveform spanning the frame. Label VO · EN.
- MOTION
- Object transformation (the brief's transition system): each text line scales X ×4 and loses its letters into bars over 12 frames; bars ripple into waveform peaks.
- VO
- "...voice it..."
- SFX
- A breath, then the first syllable of the read, bit-crushed into a soft digital texture.
- NEXT
- Waveform drops into a timeline track.

12 Sourced & edit

00:00:19:12 · Act III

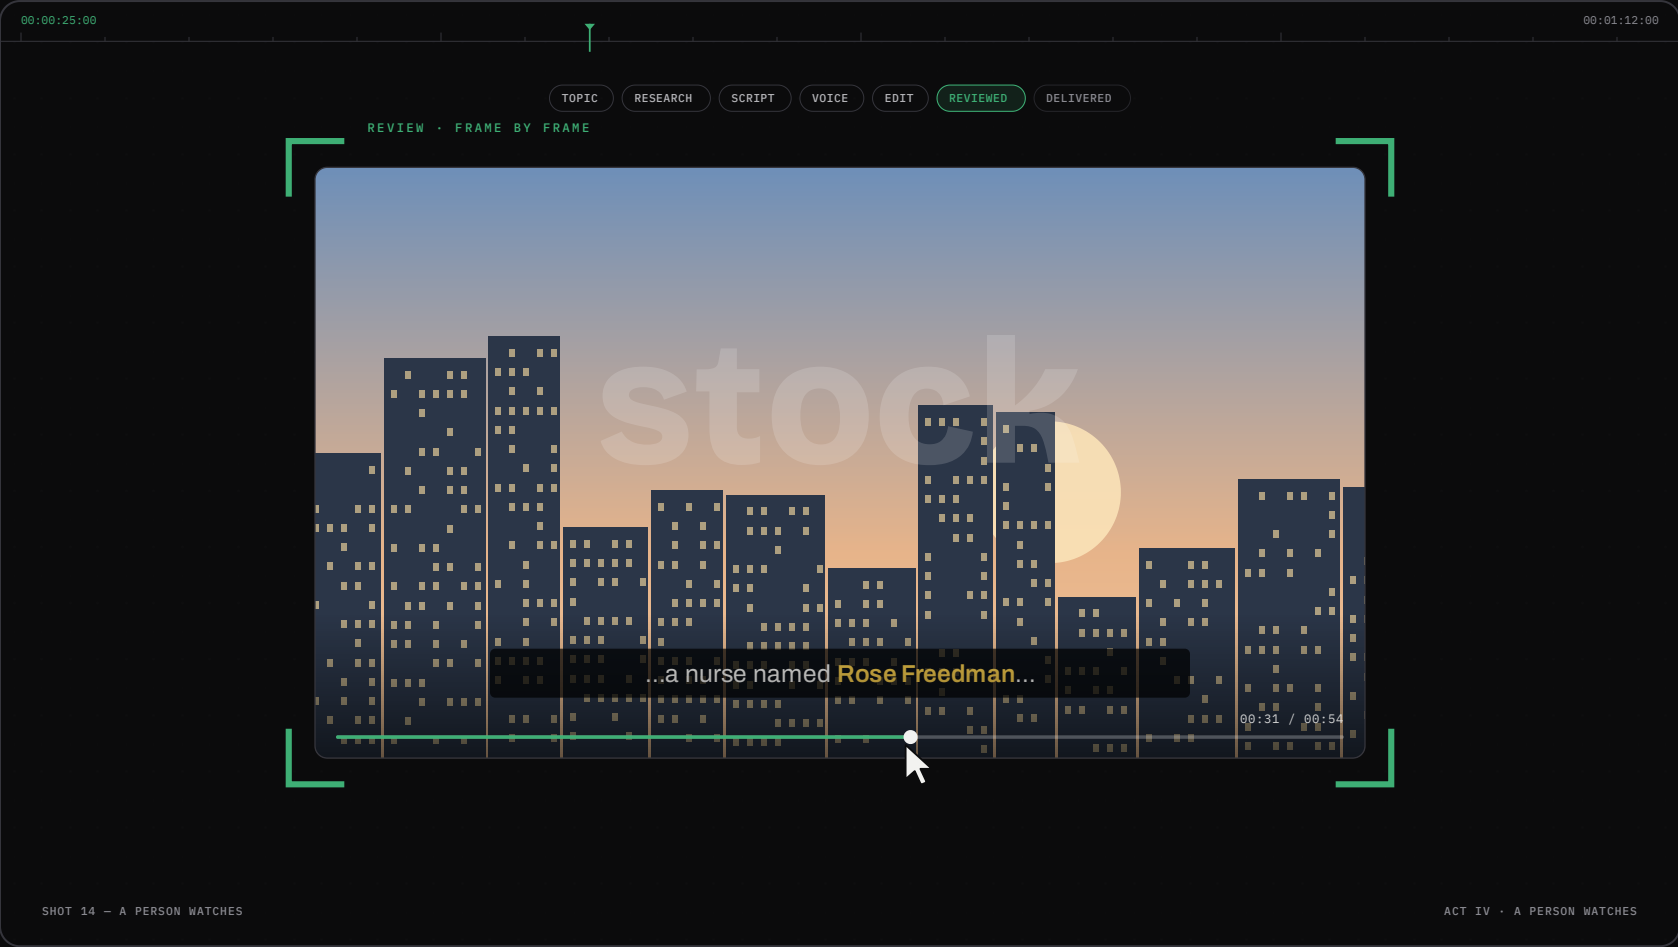

- VISUAL
- The waveform drops into A1 of an edit timeline. Map, archive and lock-diagram clips fly into V1; graphics (–41%, 26 m, 50M gal) into V2; music bed into A2. Programme monitor above.
- MOTION
- Clips slide in on their tracks and butt-join with a satisfying snap. Playhead sweeps; the monitor updates per clip.
- VO
- "...source every shot, and cut it."
- SFX
- Timeline snaps (magnetic clicks), a quick scrub.
- NEXT
- Timeline folds up into a single player.

13 Compressed to a file

00:00:22:12 · Act III

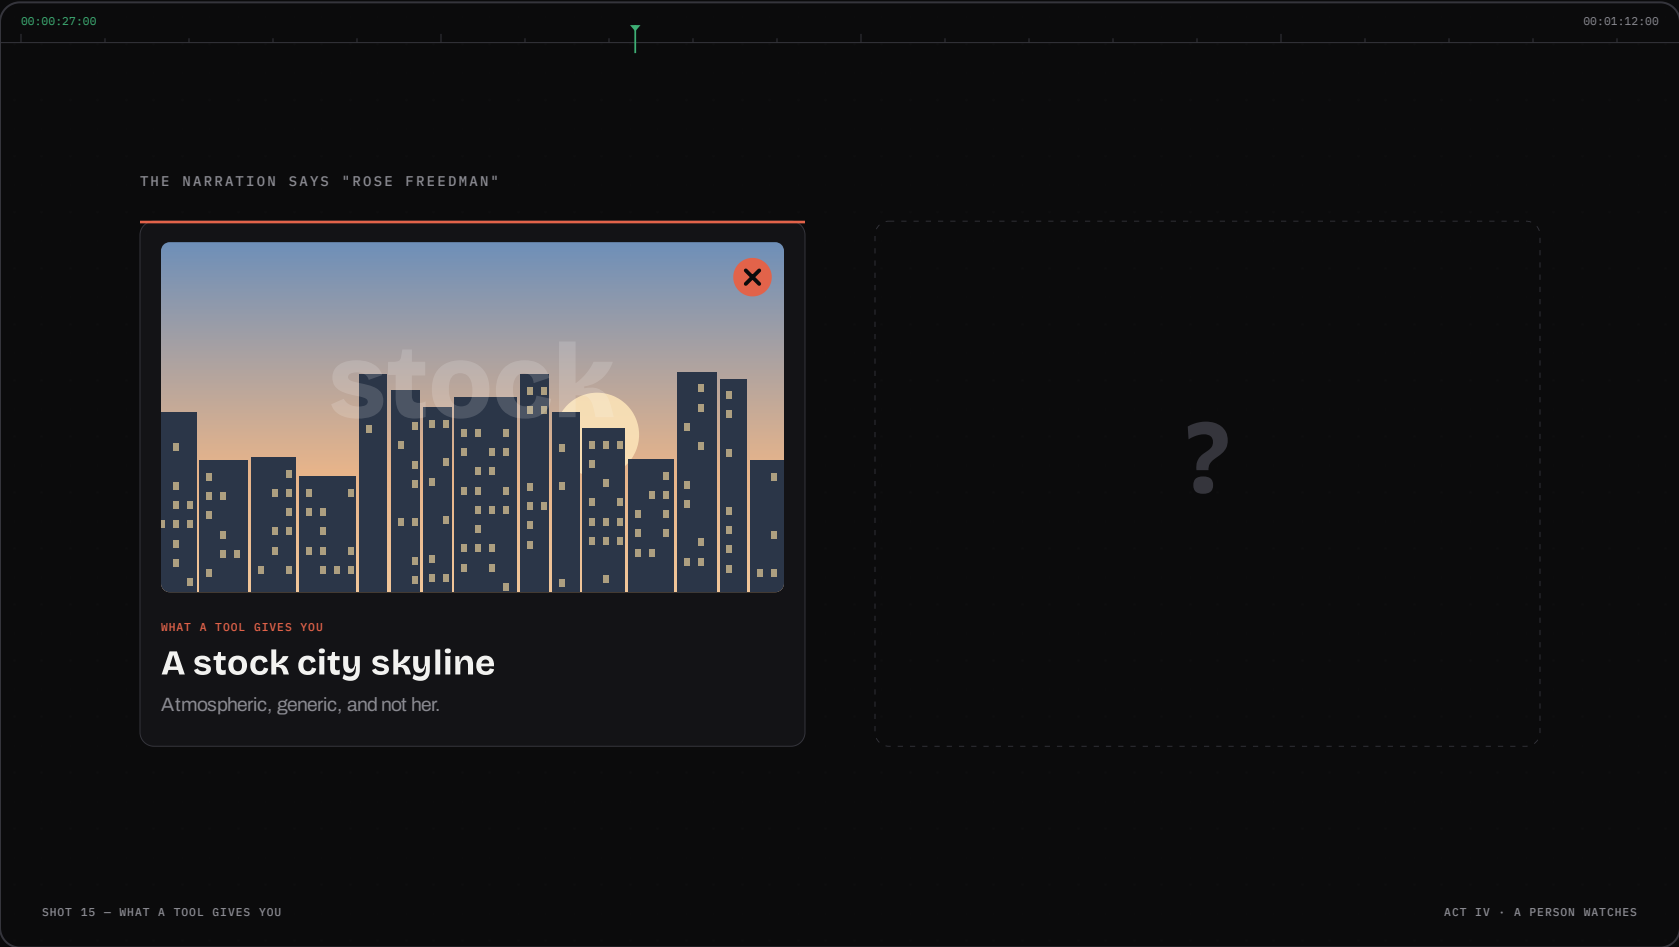

VISUAL	The timeline tracks fold upward into one finished player. REVIEWED is next in the pills. The pace starts to slow.
MOTION	Tracks stack and collapse into the player's bottom edge (accordion). Start of the speed ramp: 100% → 40% over 2s.
VO	(beat)
SFX	Sound thins out; music filter closes.
NEXT	Brackets return around the player.

14 A person watches

00:00:25:00 · Act IV

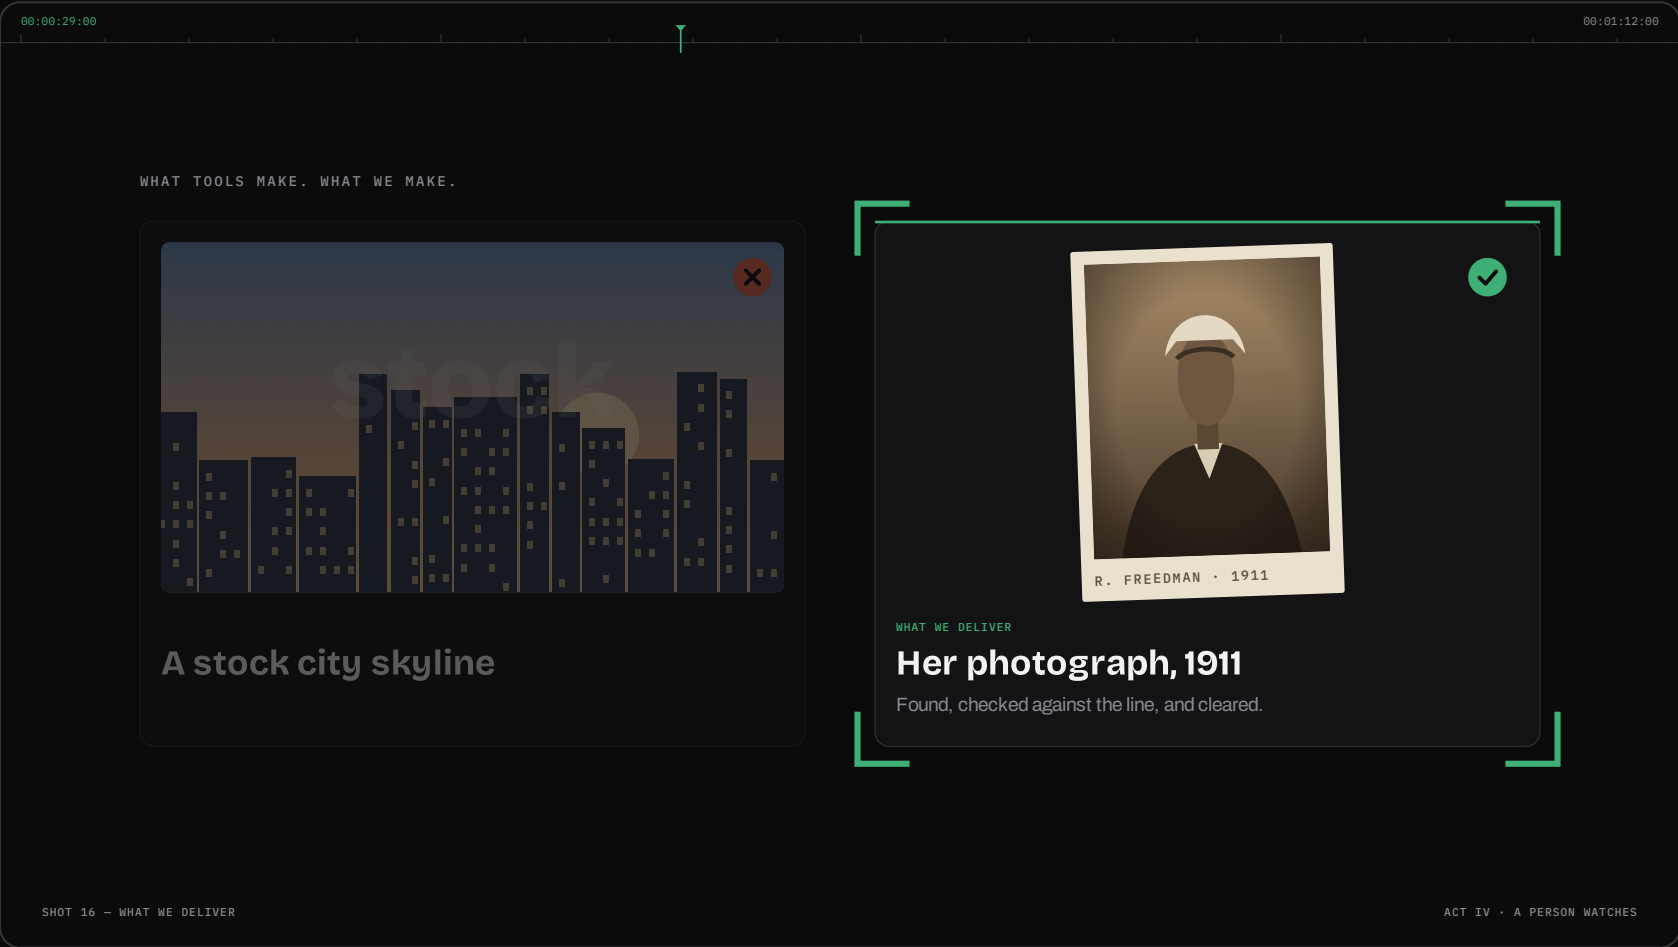

VISUAL	Slow motion. The brackets close around the player. A cursor scrubs; the caption reads "...a nurse named Rose Freedman..." but the picture is a generic stock skyline.
MOTION	Everything at 40% speed. Brackets settle with a long ease. Cursor drags the scrubber frame by frame.
VO	"Then a person watches all of it."
SFX	Near silence. A slow, tactile scrub sound, frame ticks.
NEXT	Freeze on the wrong shot.

15 What a tool gives you

00:00:27:00 · Act IV

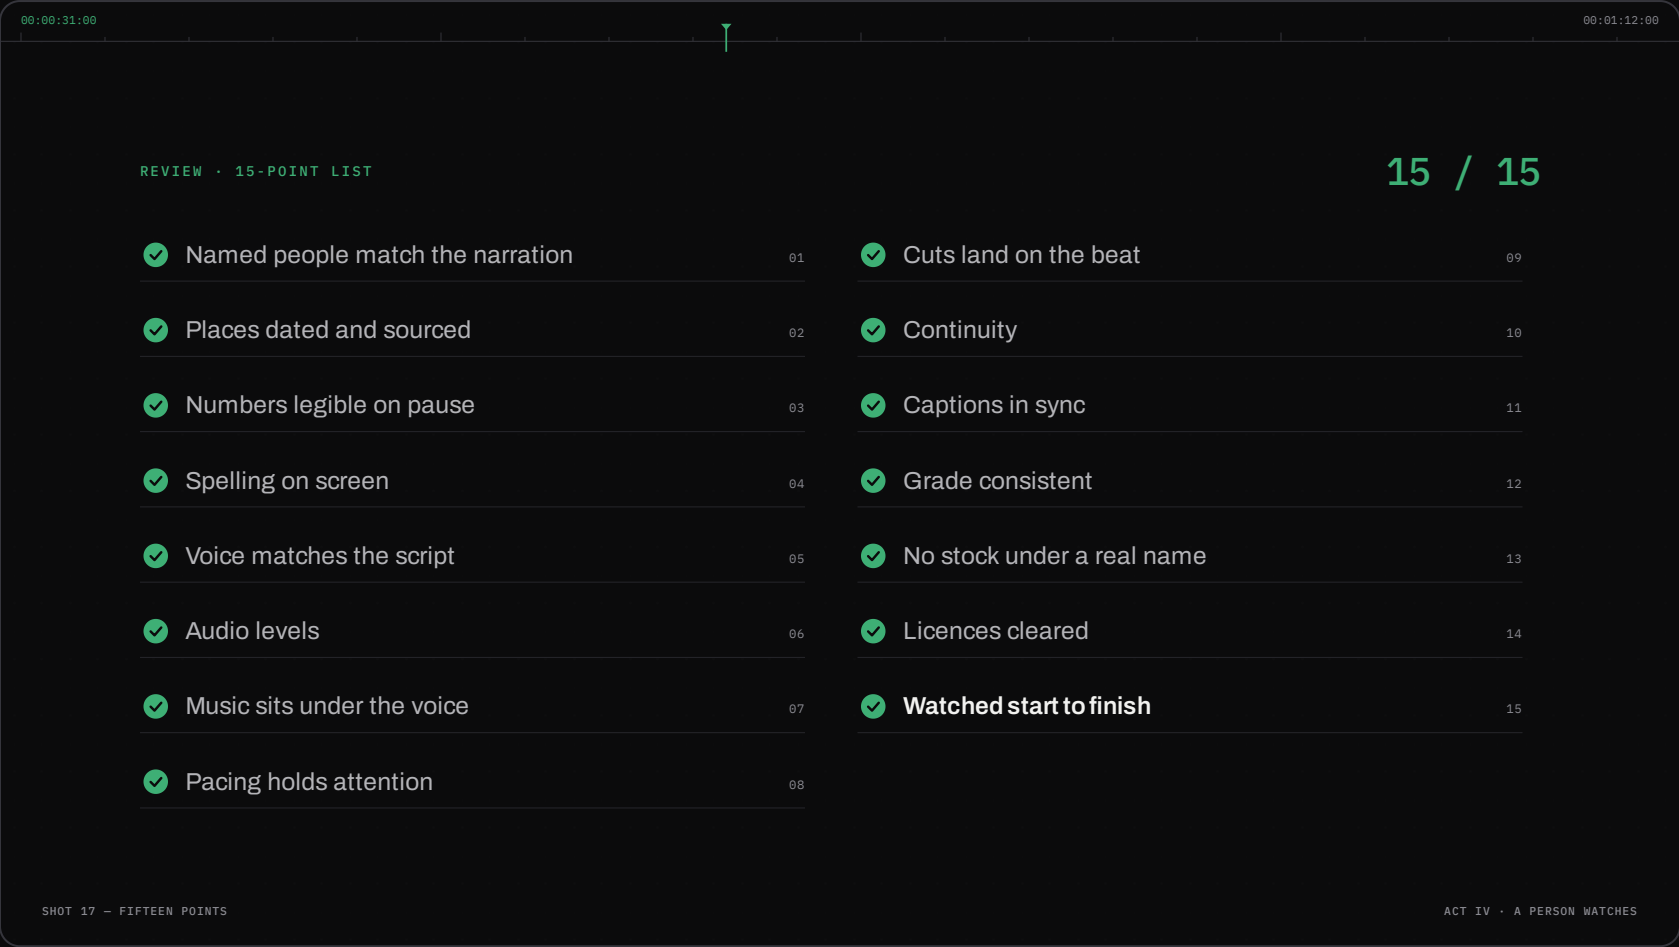

VISUAL	Frame holds. Header: THE NARRATION SAYS "ROSE FREEDMAN". The stock skyline is marked with a coral cross: "A stock city skyline. Atmospheric, generic, and not her."
MOTION	Player shrinks left to a card; coral rule draws along its top edge. The cross stamps in with a small shake.
VO	"An AI tool picks on mood..."
SFX	Dull, muted "wrong" blip.
NEXT	The brackets lock onto the empty right side.

16 What we deliver

00:00:29:00 · Act IV

VISUAL	The brackets lock onto the right card and her actual photograph lands: "Her photograph, 1911. Found, checked against the line it sits under, and cleared."
MOTION	Brackets snap with overshoot (.34,1.45,64,1). Photo drops in like a print on a desk, 2° settle. Green rule draws; check pops.
VO	"...we find her."
SFX	Crisp camera-shutter click + warm confirmation tone (the signature, softer).
NEXT	Push into a checklist.

17 Fifteen points

00:00:31:00 · Act IV

- VISUAL

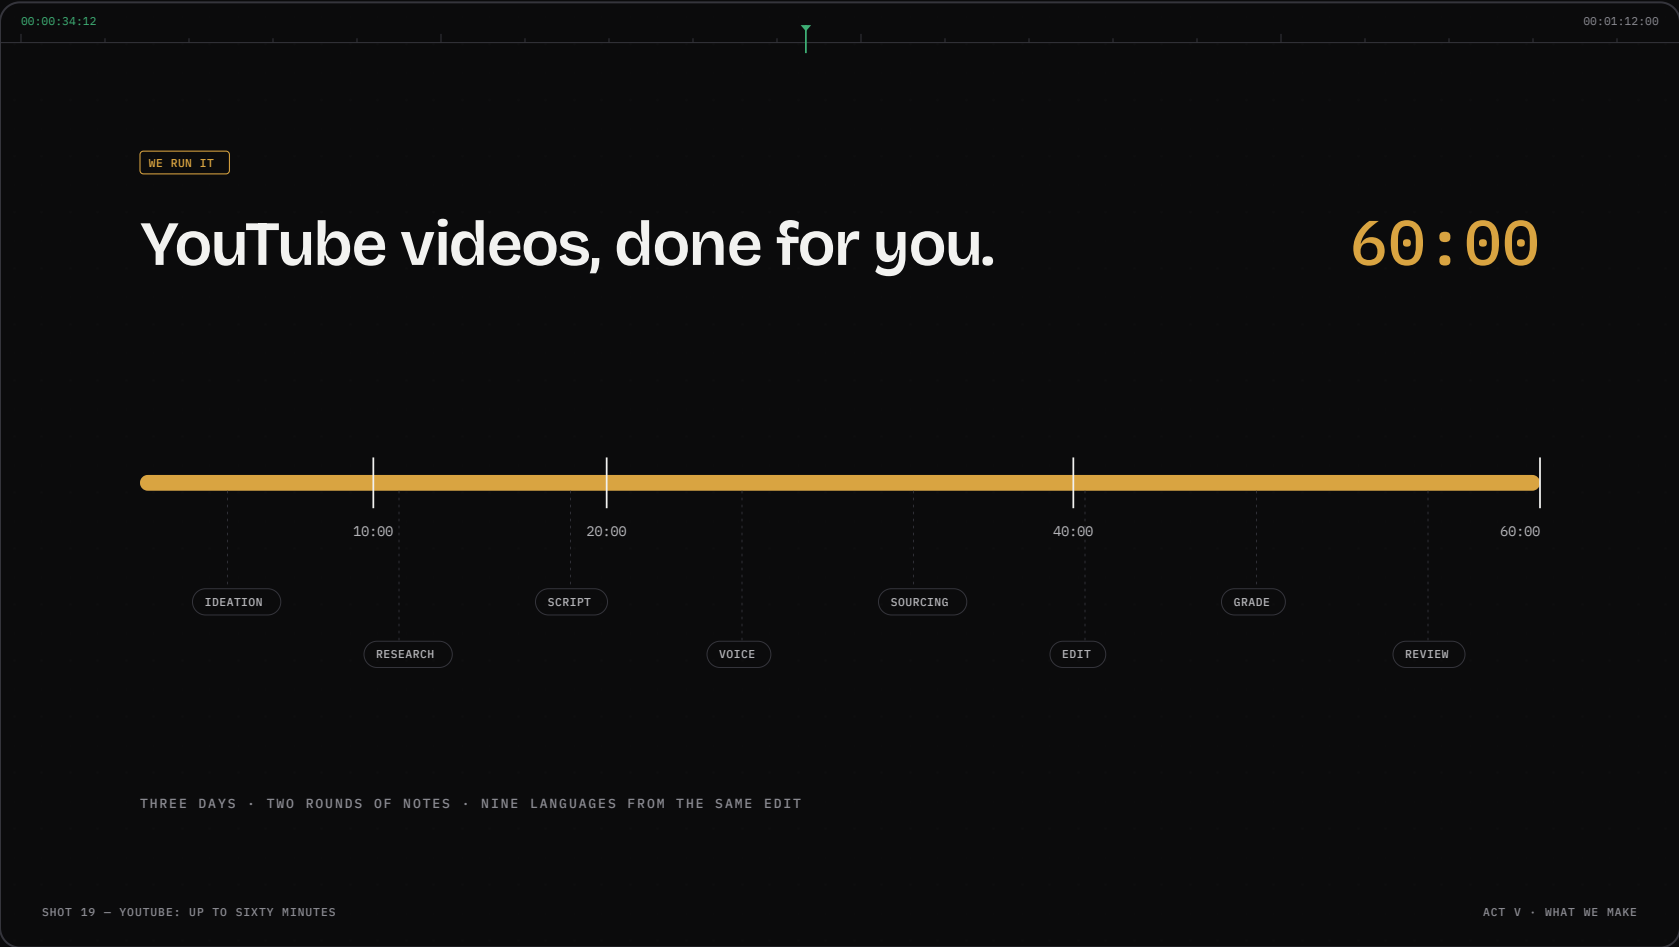

A clean checklist: the 15-point review. Items tick down two columns; counter reads 15 / 15. (Item wording is placeholder: swap in brew's real list.)
- MOTION

Each row: checkpops, text brightens from grey to white, 60ms stagger, accelerating slightly toward the end.
- VO

"Every frame, before you ever see it."
- SFX

A rhythm of soft ticks that resolves into a chord.
- NEXT

Checklist fades; super comes forward.

19 YouTube: up to sixty minutes

00:00:34:12 · Act V

- VISUAL

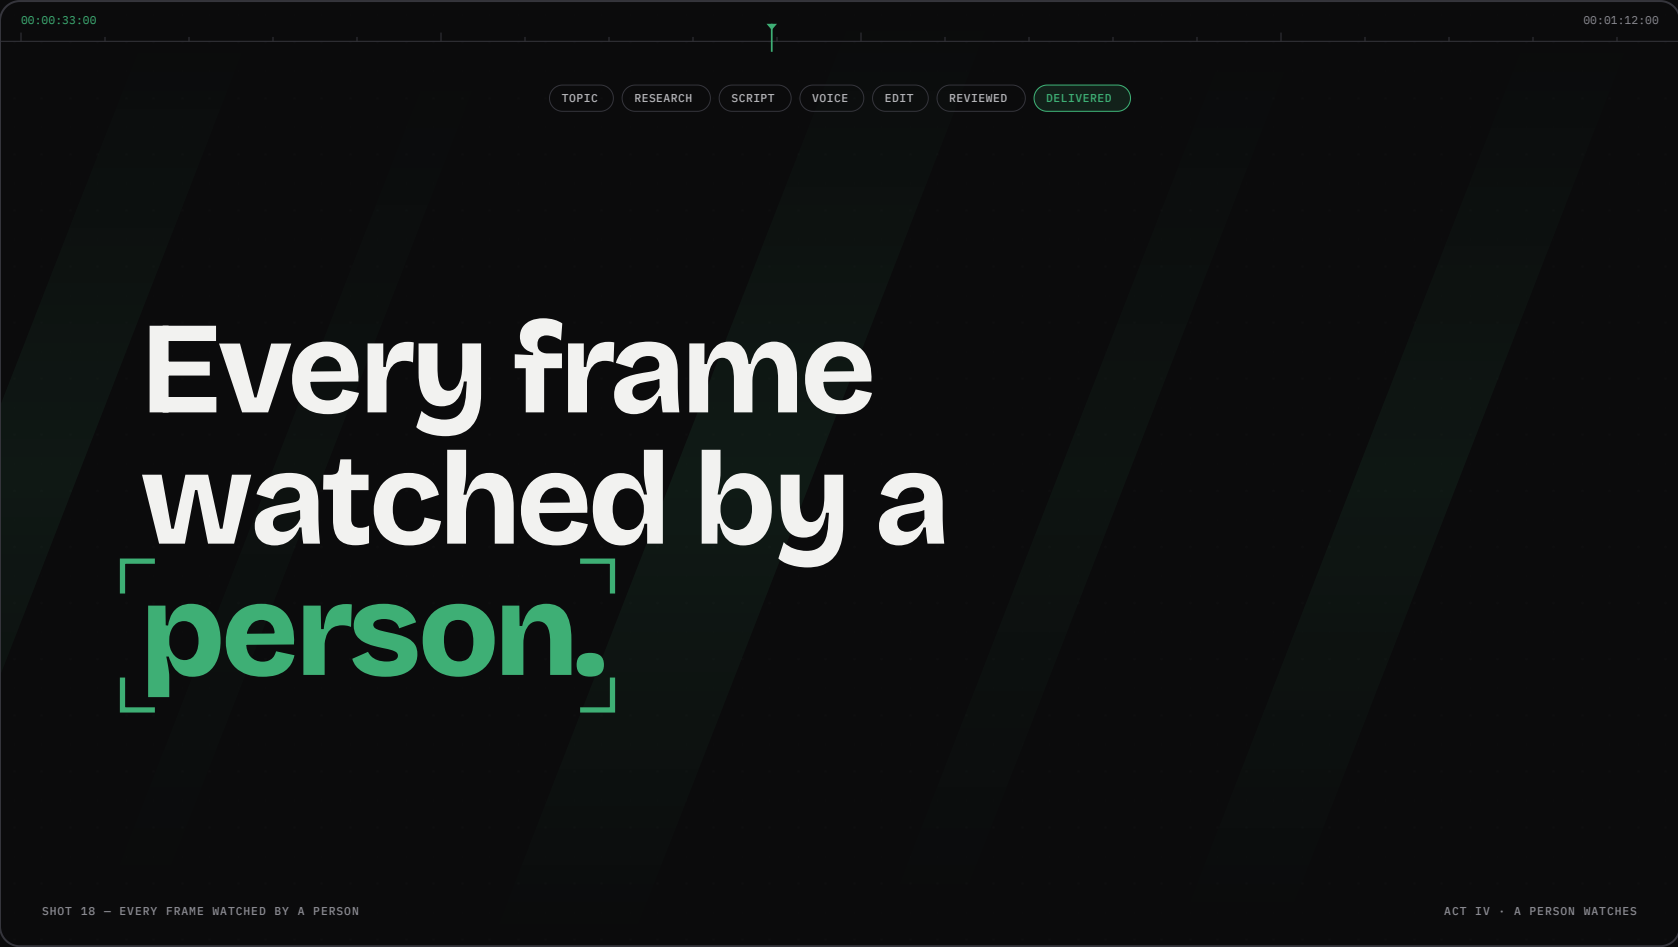

Amber accent (the site's YouTube colour). A timeline bar grows across the frame while the counter rolls 10:00 → 20:00 → 40:00 → 60:00. Everything brew does hangs off it as tags.
- MOTION

Bar extends in 4 hits (one per milestone) with a slight overshoot each. Tags drop on strings and swing to rest.
- VO

"Long-form YouTube, up to sixty minutes..."
- SFX

Four rising "stamp" hits on the milestones.
- NEXT

Bar folds into a finished video card.

18 Every frame watched by a person

00:00:33:00 · Act IV

- VISUAL

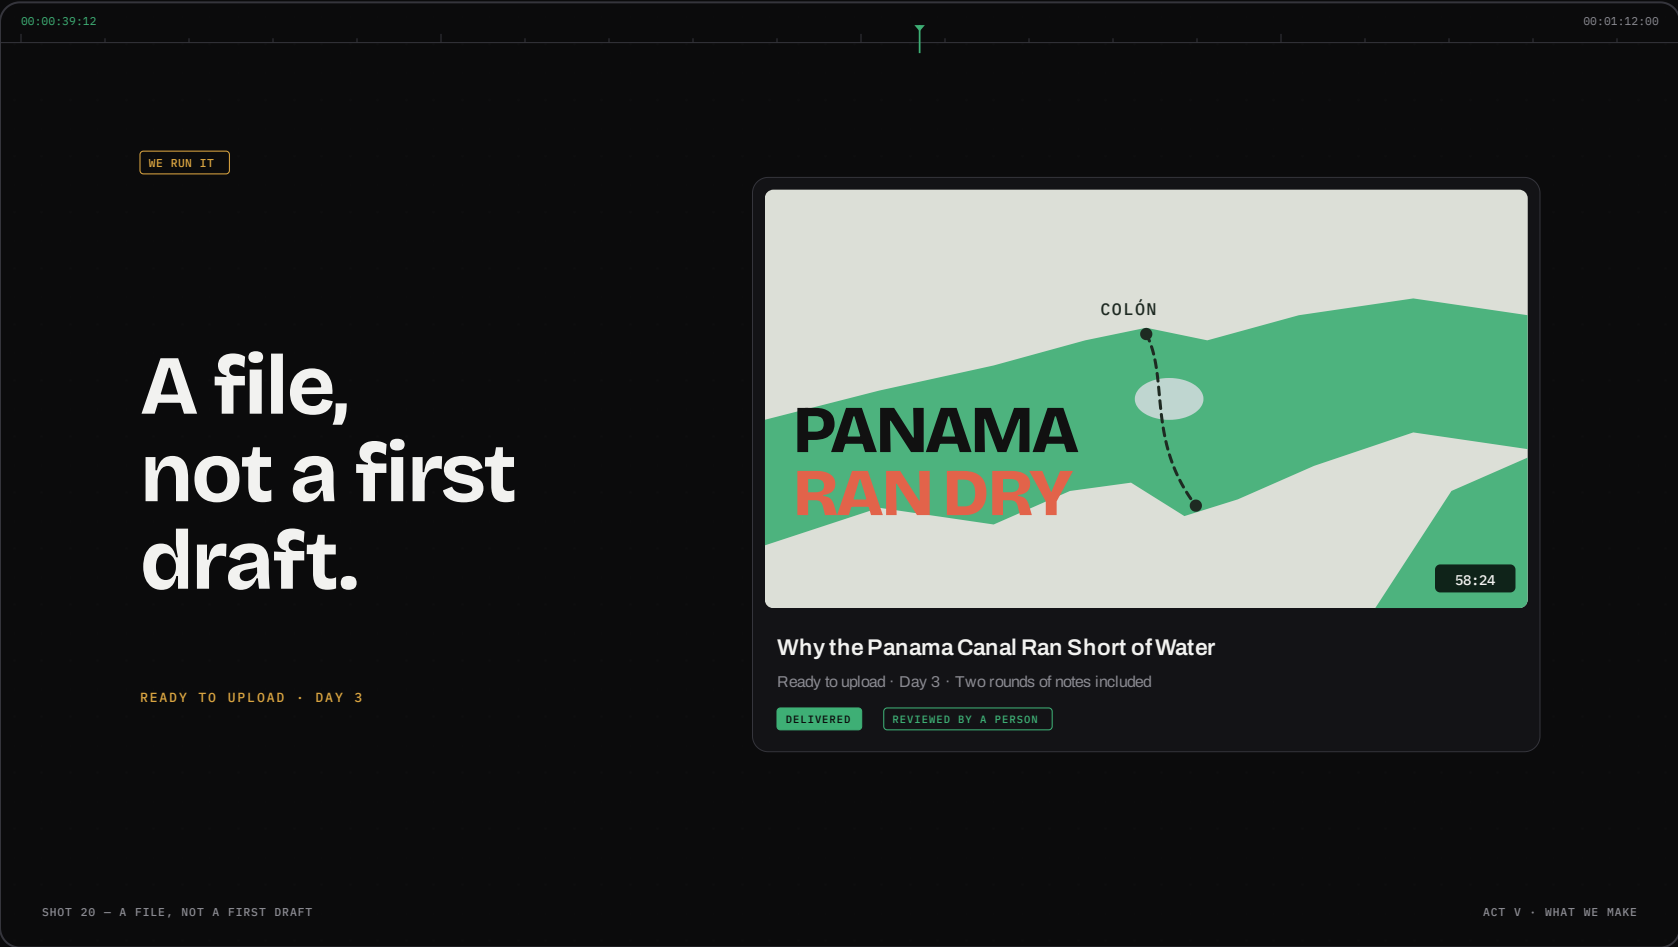

Hero type, the site's own line: "Every frame watched by a person." "person" in brand green, framed by small brackets. Pills: REVIEWED done, DELIVERED lights.
- MOTION

Words rise through a mask, 40ms stagger; the brackets snap around "person". Speed returns to 100% on the cut out.
- VO

(VO rests; let the line read.)
- SFX

The brew signature note, full.
- NEXT

Whip-pan to amber: YouTube.

20 A file, not a first draft

00:00:39:12 · Act V

- VISUAL

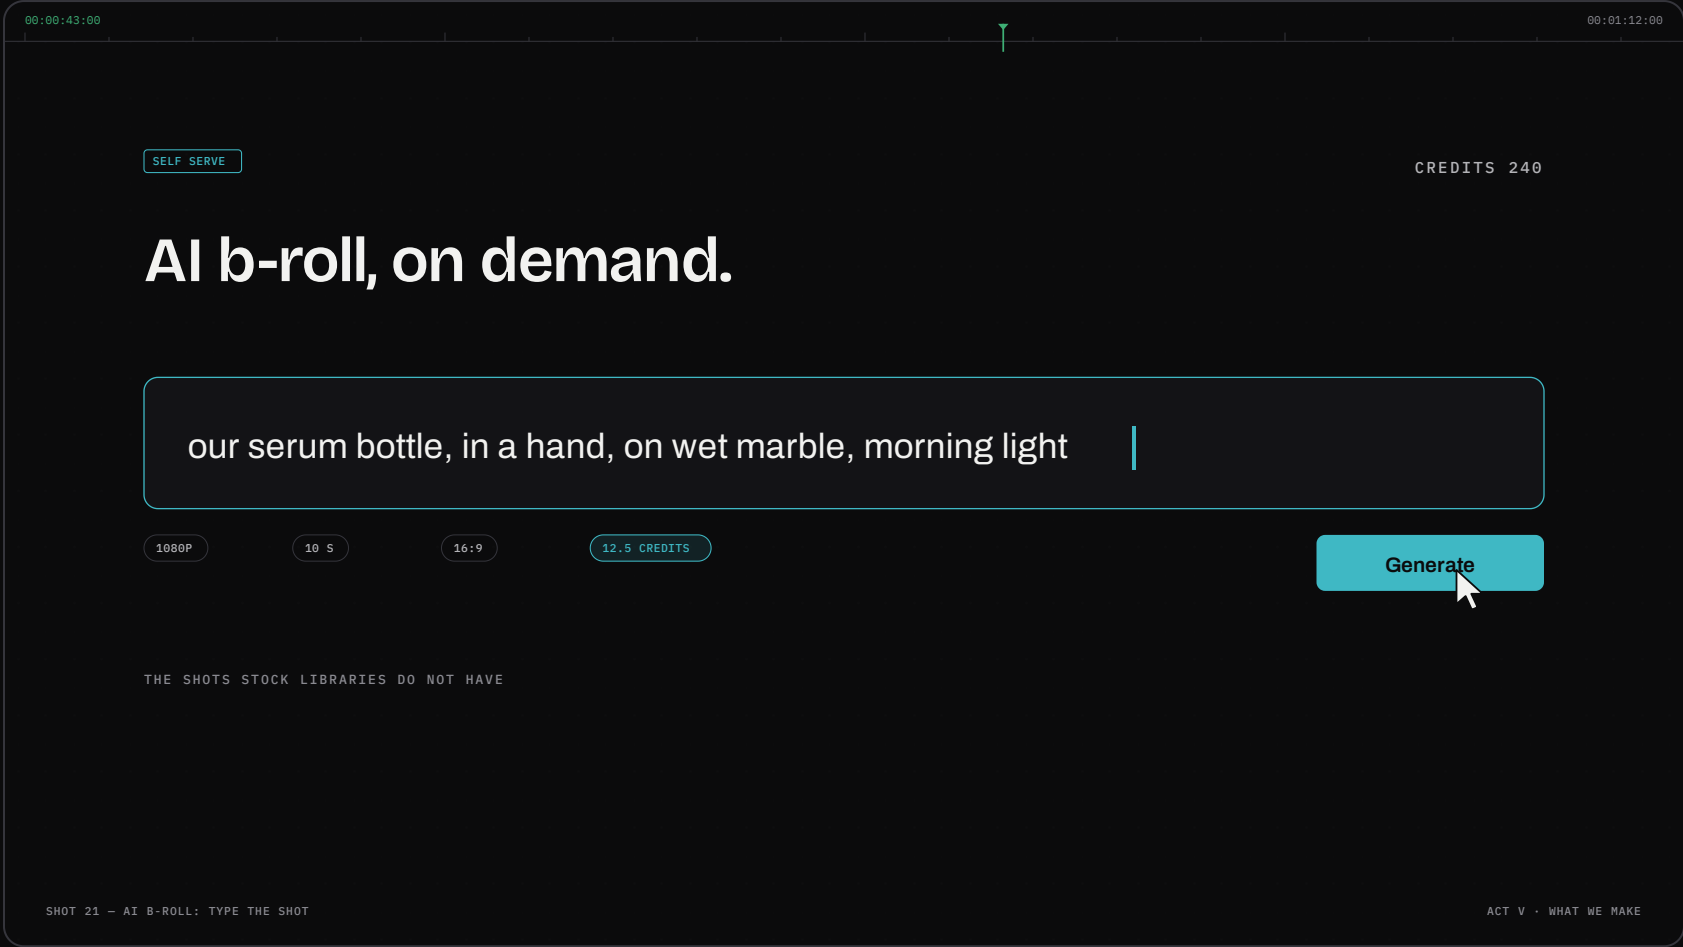

The timeline folds into a finished, brand-neutral video card: map thumbnail with "PANAMA RAN DRY", 58:24 badge, "Ready to upload · Day 3". Super: "A file, not a first draft."
- MOTION

Card scales up from the bar; thumbnail parallax 8px. Delivered tag stamps in.
- VO

"...three days, start to finish."
- SFX

Soft whoosh into a clean "ding".
- NEXT

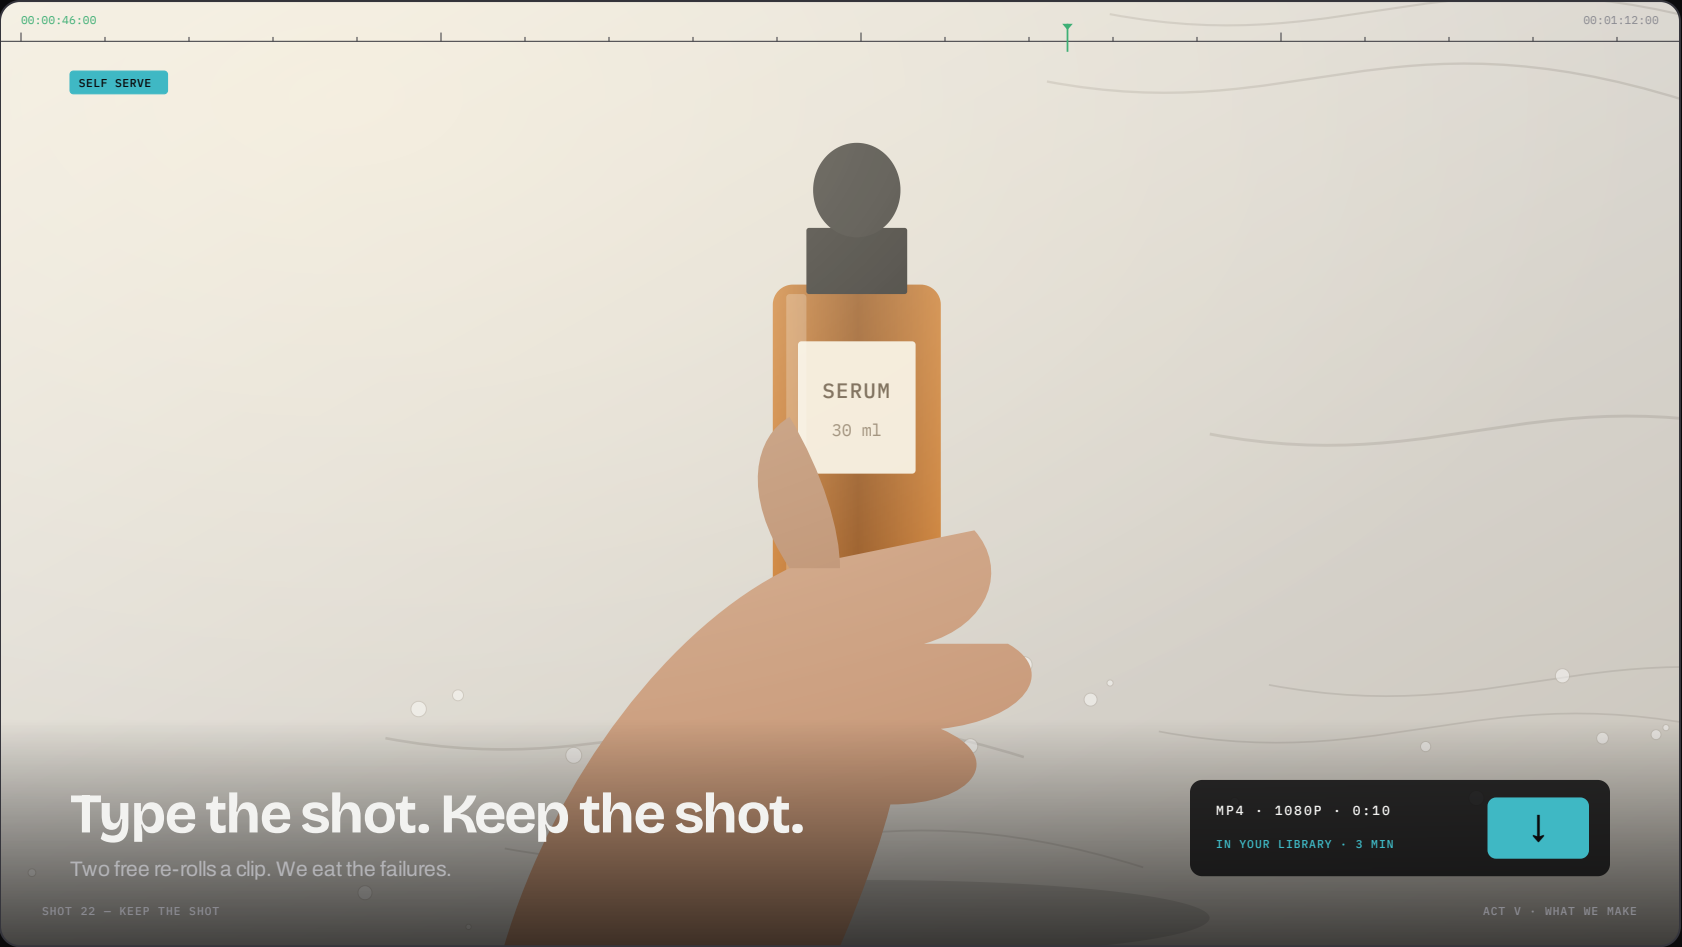

Hard cut to teal; the thumbnail's map dissolves into a prompt field.

21 AI b-roll: type the shot

00:00:43:00 · Act V

VISUAL	Teal accent, SELF SERVE tag (the site's own labelling). A prompt field: "our serum bottle, in a hand, on wet marble, morning light". Options: 1080p · 10s · 12.5 credits. Generate button.
MOTION	Typing with teal caret. Options flip in. Cursor glides to Generate and clicks (button depresses 2px).
VO	"Need a shot that doesn't exist? Type it."
SFX	Lighter, faster keys than Act III; button click.
NEXT	Button press blooms into the generated clip.

22 Keep the shot

00:00:46:00 · Act V

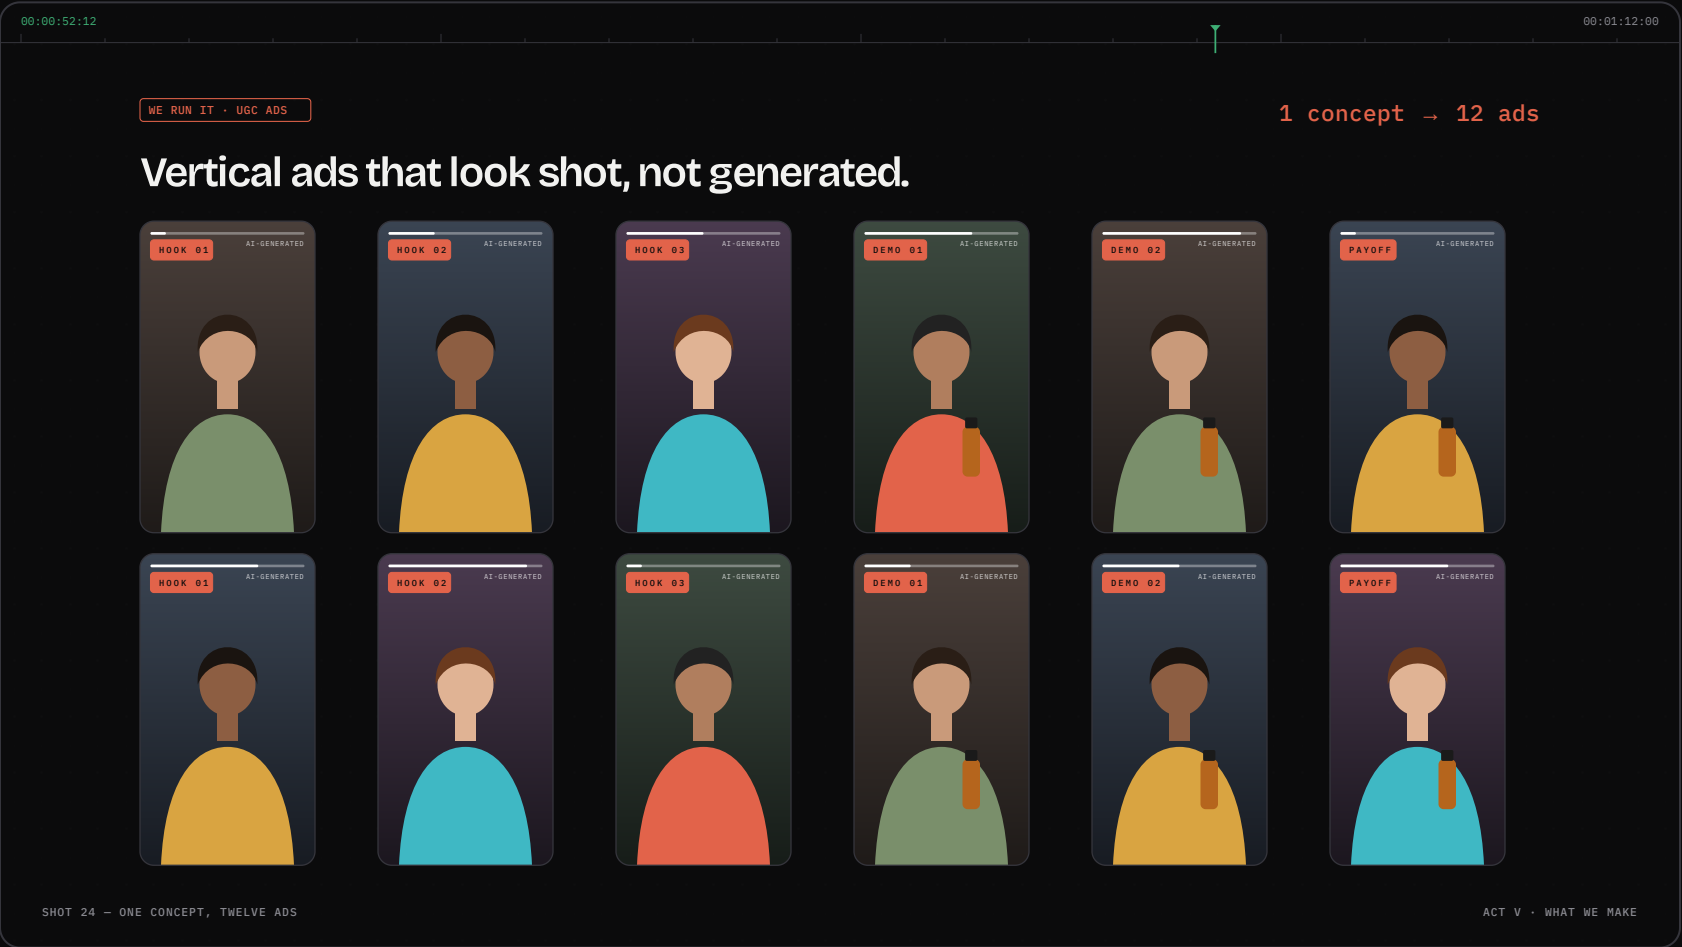

VISUAL	The generated clip fills the frame: the serum bottle in a hand on wet marble. UI chips float over it: MP4 · 1080p · 0:10, "In your library · 3 min", Download.
MOTION	Clip expands from the button's bounds to full-bleed (shared-element transition). Subtle 3% push-in. Chips slide up, 40ms stagger.
VO	"Download it in minutes."
SFX	Bloom swell; download "tok".
NEXT	Clip shrinks into a vertical phone frame.

23 UGC ads: hooks

00:00:49:00 · Act V

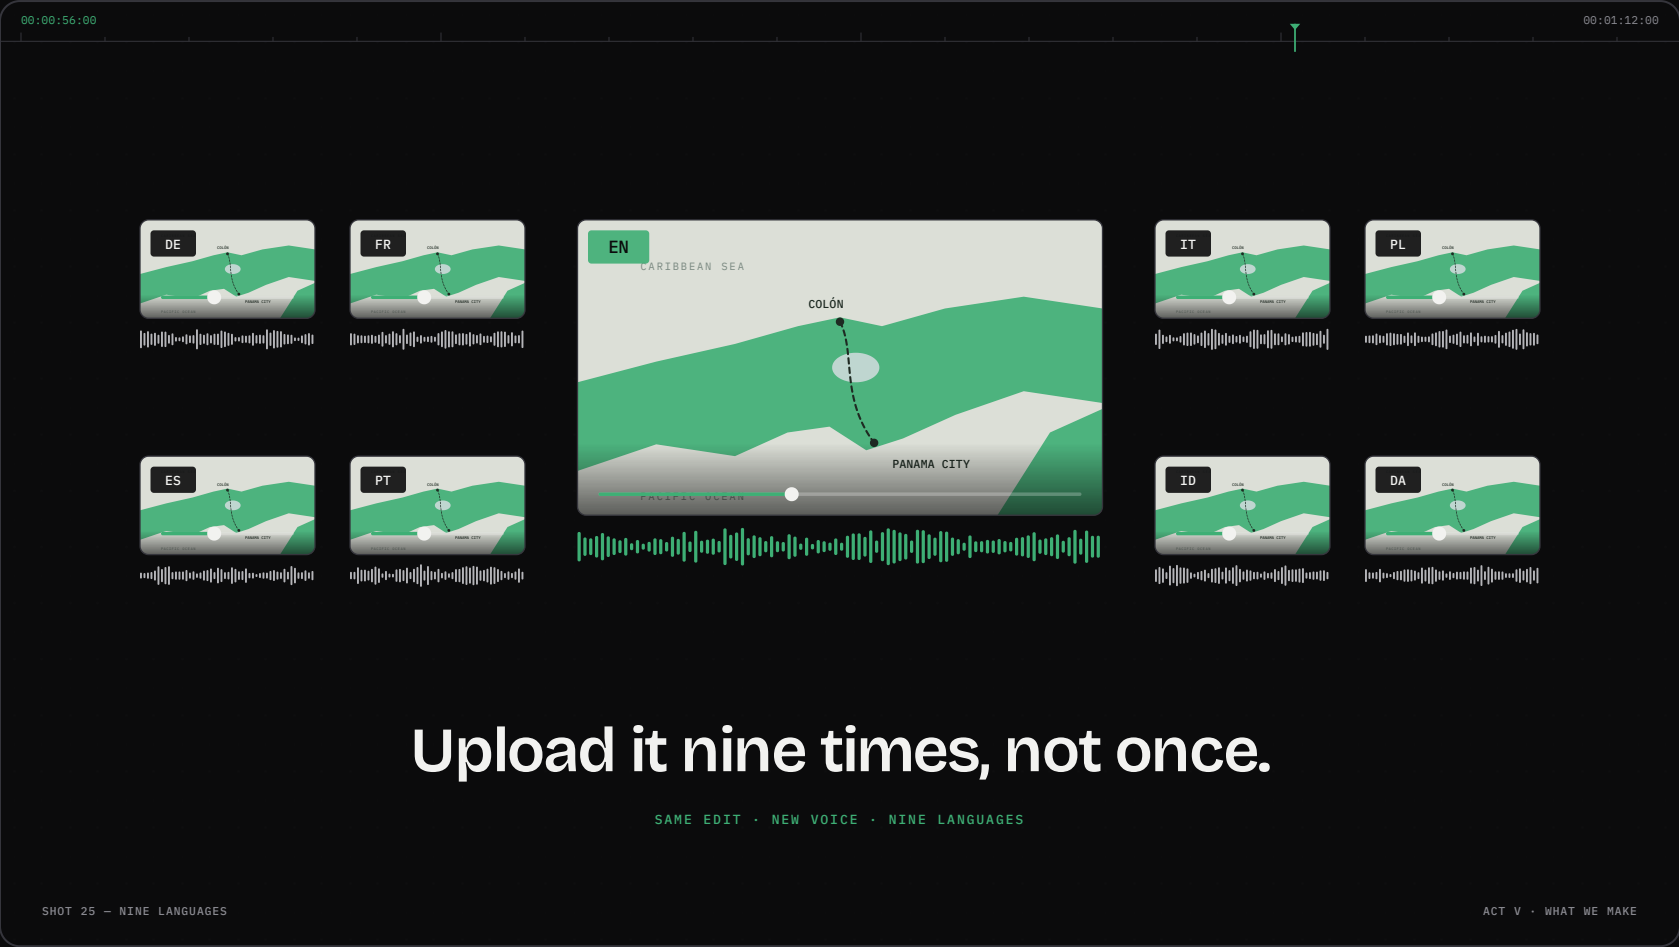

VISUAL	Coral accent. Three vertical ads side by side, each a different synthetic creator holding the same product. HOOK 01 / 02 / 03, burned-in captions, on-screen AI-GENERATED label.
MOTION	Phones flip in on Y axis, staggered. Captions highlight word by word (as on brew's commentary samples).
VO	"Ads that look shot, not generated."
SFX	Three quick social-feed swipes, each a different voice snippet.
NEXT	Phones duplicate into a grid.

24 One concept, twelve ads

00:00:52:12 · Act V

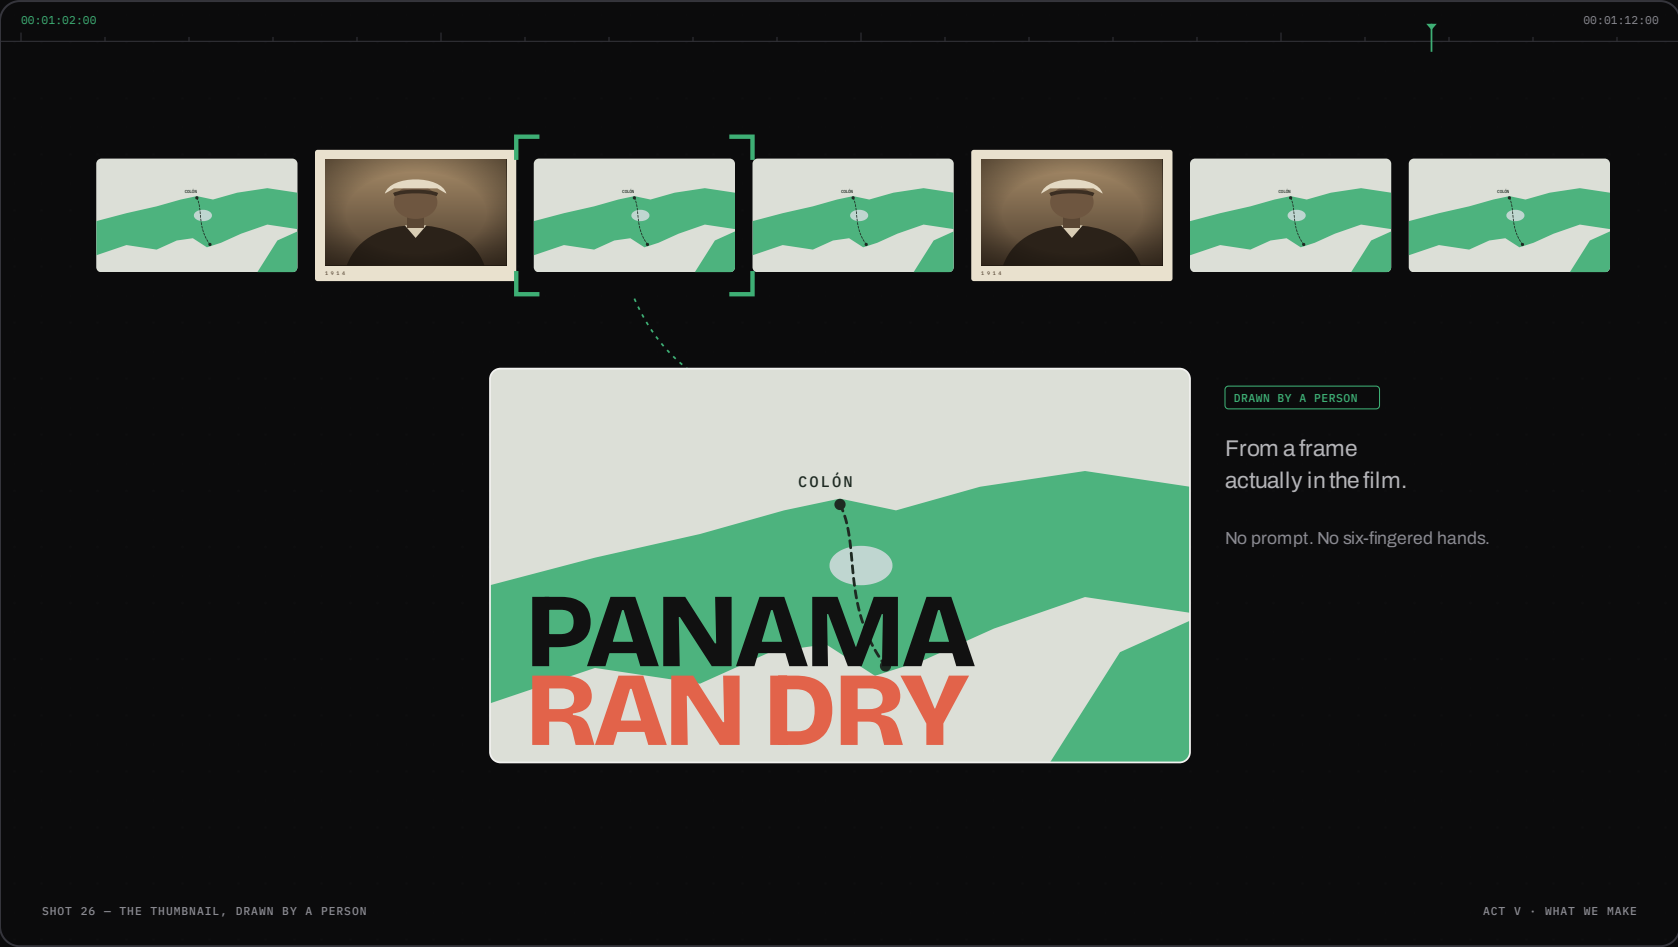

VISUAL	The three phones multiply into a grid of 12: HOOK × DEMO × PAYOFF combinations. Counter: 1 concept → 12 ads ready to test.
MOTION	Grid builds outward from the centre column, 30ms stagger; camera pulls back to reveal scale. Counter rolls.
VO	"Hooks, demos and payoffs, at the volume you actually test."
SFX	Rapid cascade of soft pops, one per ad.
NEXT	Grid collapses into one horizontal video for languages.

25 Nine languages

00:00:56:00 · Act V

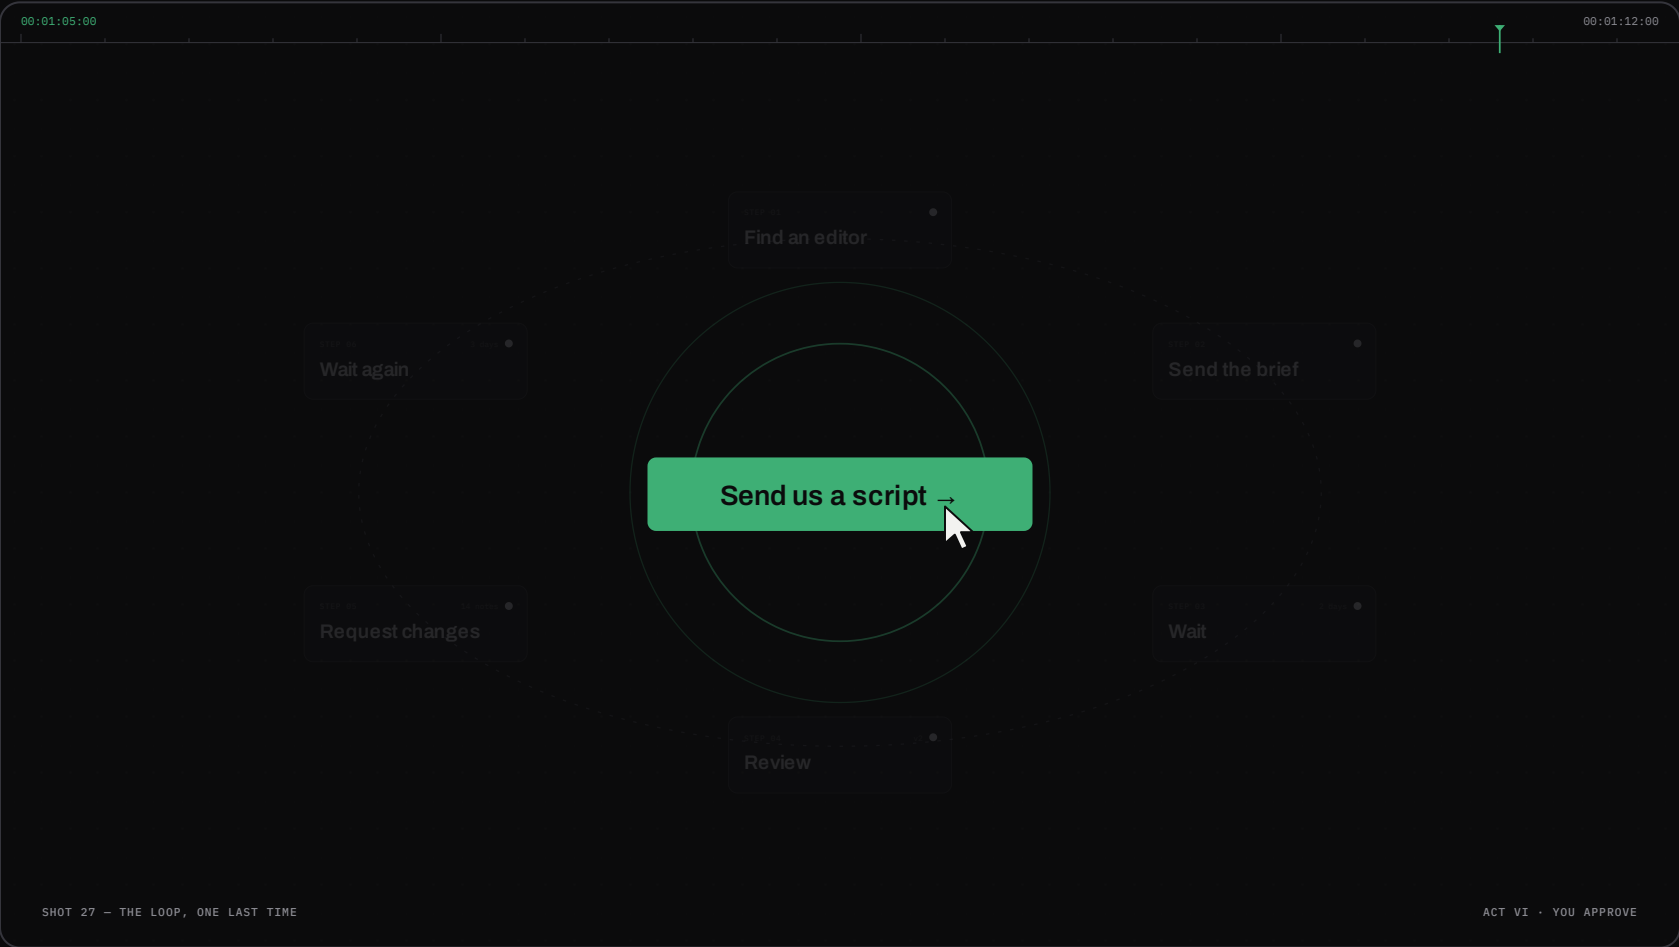

VISUAL	One finished video centre (EN). Eight copies fan out around it (DE FR ES PT IT PL ID DA), the exact nine on brew's site. Same picture in every copy; only the waveform under each changes.
MOTION	Copies clone out of the centre player along radial paths, 50ms stagger. Each waveform re-draws in a new shape while the picture stays locked.
VO	"And when a video works, upload it nine times, not once."
SFX	One phrase of VO repeated, cross-fading through languages.
NEXT	All nine stack into a film strip.

26 The thumbnail, drawn by a person

00:01:02:00 · Act V

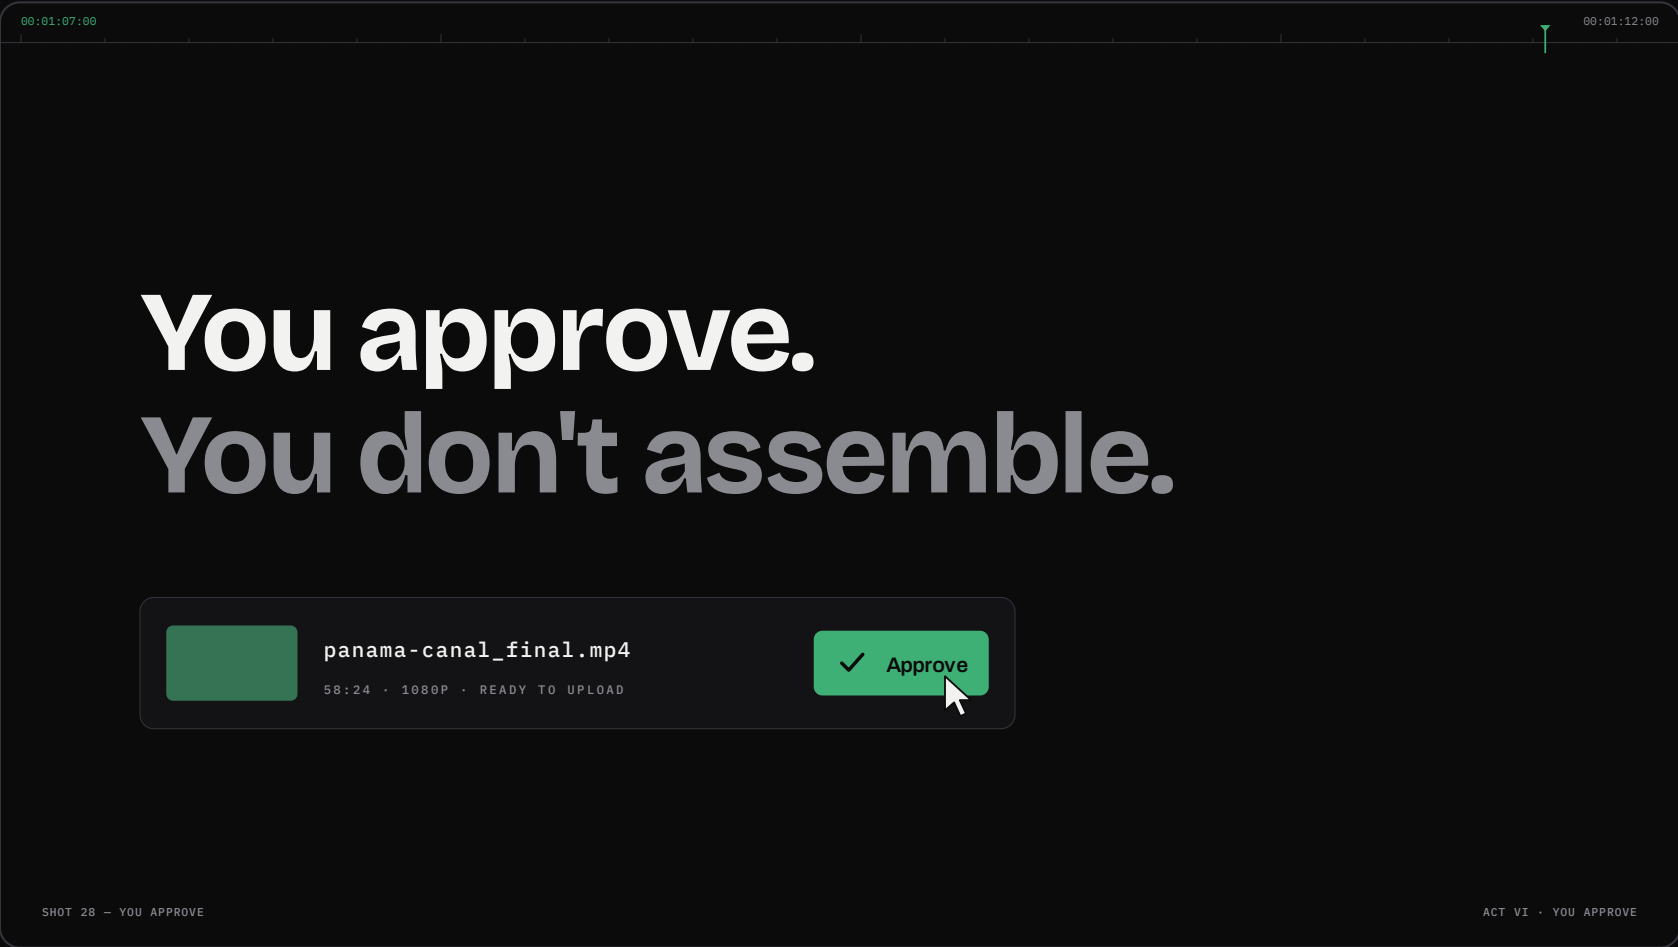

VISUAL	A film strip of frames from the actual video. The brackets pick one real frame; it lifts out and type is set over it by hand: "PANAMA RAN DRY". Label: DRAWN BY A PERSON.
MOTION	Strip scrolls R → L, decelerates; brackets snap to frame 3; frame lifts (shadow grows) and scales to the thumbnail canvas. Type slams in, 2 words.
VO	"Even the thumbnail is drawn by a person."
SFX	Strip whir slowing to a stop; pen-tablet scribble; stamp.
NEXT	Thumbnail slides away; the old loop ghosts back in.

27 The loop, one last time

00:01:05:00 · Act VI

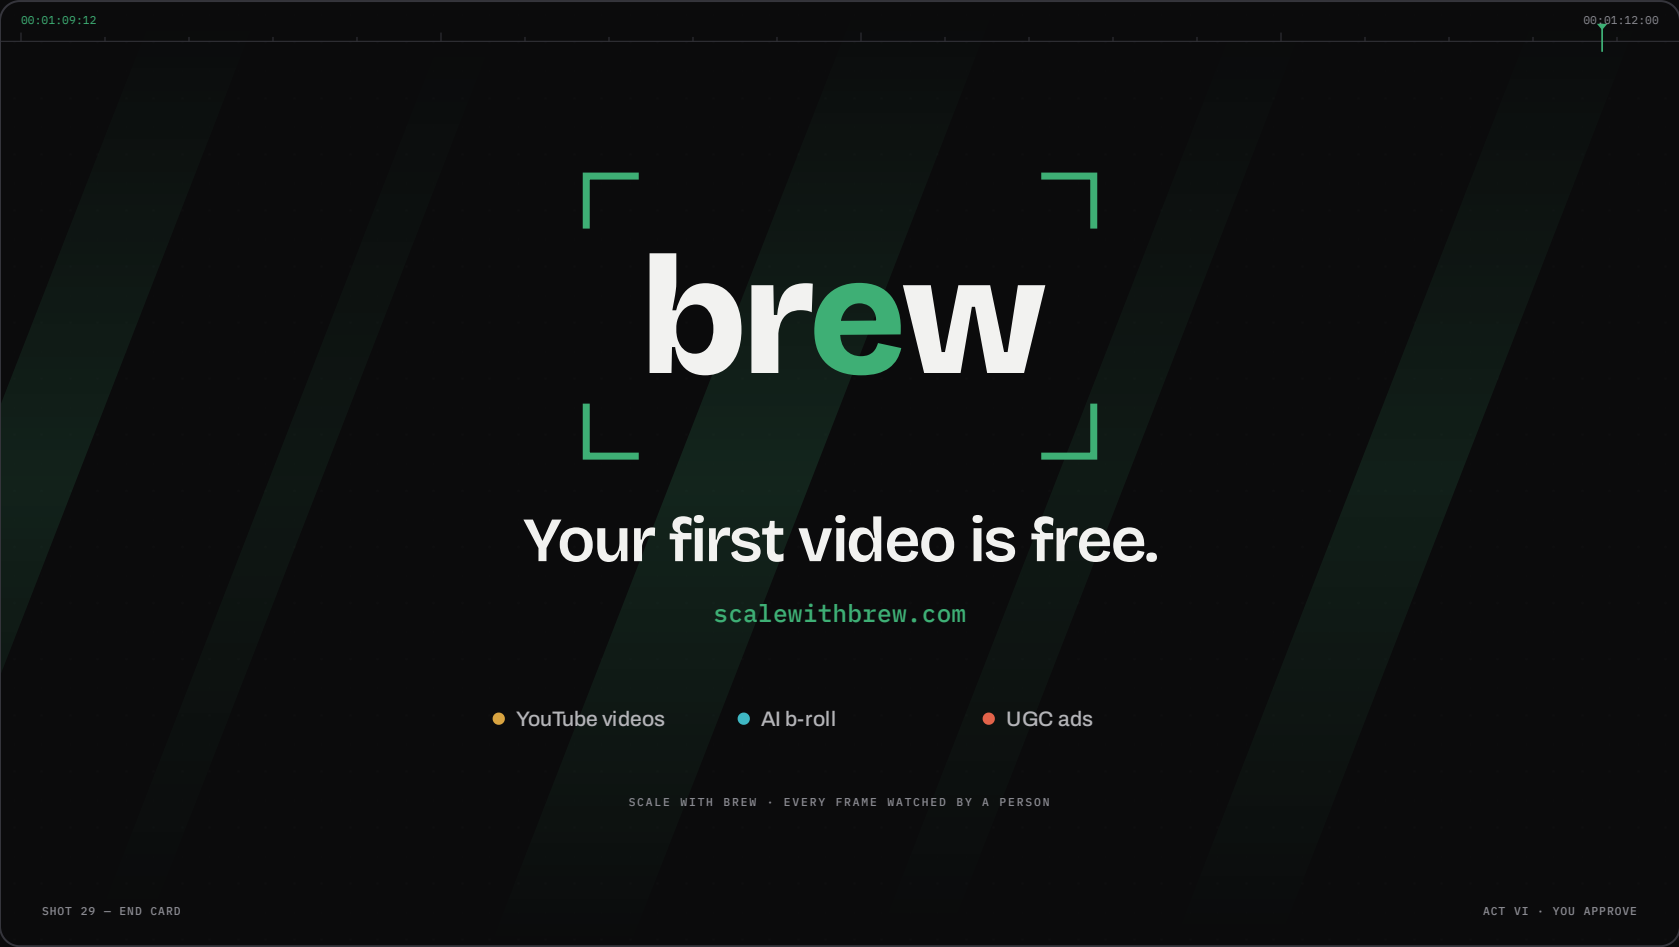

VISUAL	The Act I loop ghosts back in, grey, then collapses into a single green button: "Send us a script →" (brew's real CTA). The cursor clicks it.
MOTION	Ring cards fall inward and dissolve into the button (gravity well). Click: button depresses, two green ripple rings.
VO	"You don't manage any of that."
SFX	Reverse of the Act I notification cluster, sucked into one click.
NEXT	Button blooms into the finished file.

28 You approve

00:01:07:00 · Act VI

VISUAL	One finished file: panama-canal_final.mp4 · 58:24 · 1080p · READY TO UPLOAD, with a single Approve button. Super, two lines: "You approve." / "You don't assemble."
MOTION	File card rises; "You approve." types on; cursor clicks Approve (check fills); "You don't assemble." lands on the click.
VO	"You approve. You don't assemble."
SFX	One clean click; the brew signature begins.
NEXT	Card flips to the end card.

29 End card

00:01:09:12 · Act VI

VISUAL	brew logo in brackets. "Your first video is free." scalewithbrew.com. Product row: YouTube videos (amber) · AI b-roll (teal) · UGC ads (coral). "Scale With Brew" small.
MOTION	Brackets draw in; logo resolves; lines fade up on 40ms stagger. Hold 2s. Aurora rake drifts slowly. Cut to black on the last note.
VO	"Your first video is free. brew."
SFX	brew signature resolves; tail out.
NEXT	Black.
