

BREW · 60-SECOND CINEMATIC LAUNCH CUT · ALTERNATIVE TO V1

The camera lives inside the product.

60 S · 16:9 · 20 SHOTS · 120 BPM, CUT ON THE BEAT

V1 VS V2

v1 tells the story with metaphor (the loop, the freeze). v2 is a product launch: real brew Studio screens, macro shots, camera moves, big statements on the beat. Same brand, same facts, same ending.

CAMERA LANGUAGE

Macro (100 mm) on UI details with rack focus; low-angle crane reveals; lateral tracking along the pipeline; isometric glides over the library. Everything feels physical: glass edges catch light, windows cast shadows on a reflective floor.

LIGHT

Near-black stage. Green key light from below for brew moments; amber, teal and coral rim lights only inside their product scenes (YouTube, b-roll, UGC). Diagonal "aurora" beams from the site sweep the reveal and end card.

RHYTHM

Hook in 6 s. Statements cut on kicks, one word per beat. The music drops to a single pad for the human review (the slowest shot in the film) then rebuilds to the stats and the close.

PRODUCT UI

brew Studio screens here are a proposed design built from the site's tokens (New video, In production, Review, Library, Languages, AI b-roll). Swap in the real app UI if one exists.

01 Macro: timecode

0:00 · Hook

VISUAL	Extreme close-up of brew's timecode in IBM Plex Mono, digits rolling. A green playhead slides through frame. Shallow depth of field: outer digits fall off into blur.
CAMERA	Camera: 100mm macro, slow push 3%. Digits roll on the beat. Playhead crosses L → R in 1.2s; anamorphic green flare on its edge.
VO	(music only)
SFX	Single low sub hit on frame 1, then a ticking clock pattern in the hats.
NEXT	Hard cut on the downbeat to type.

02 You have the ideas.

0:02 · Hook

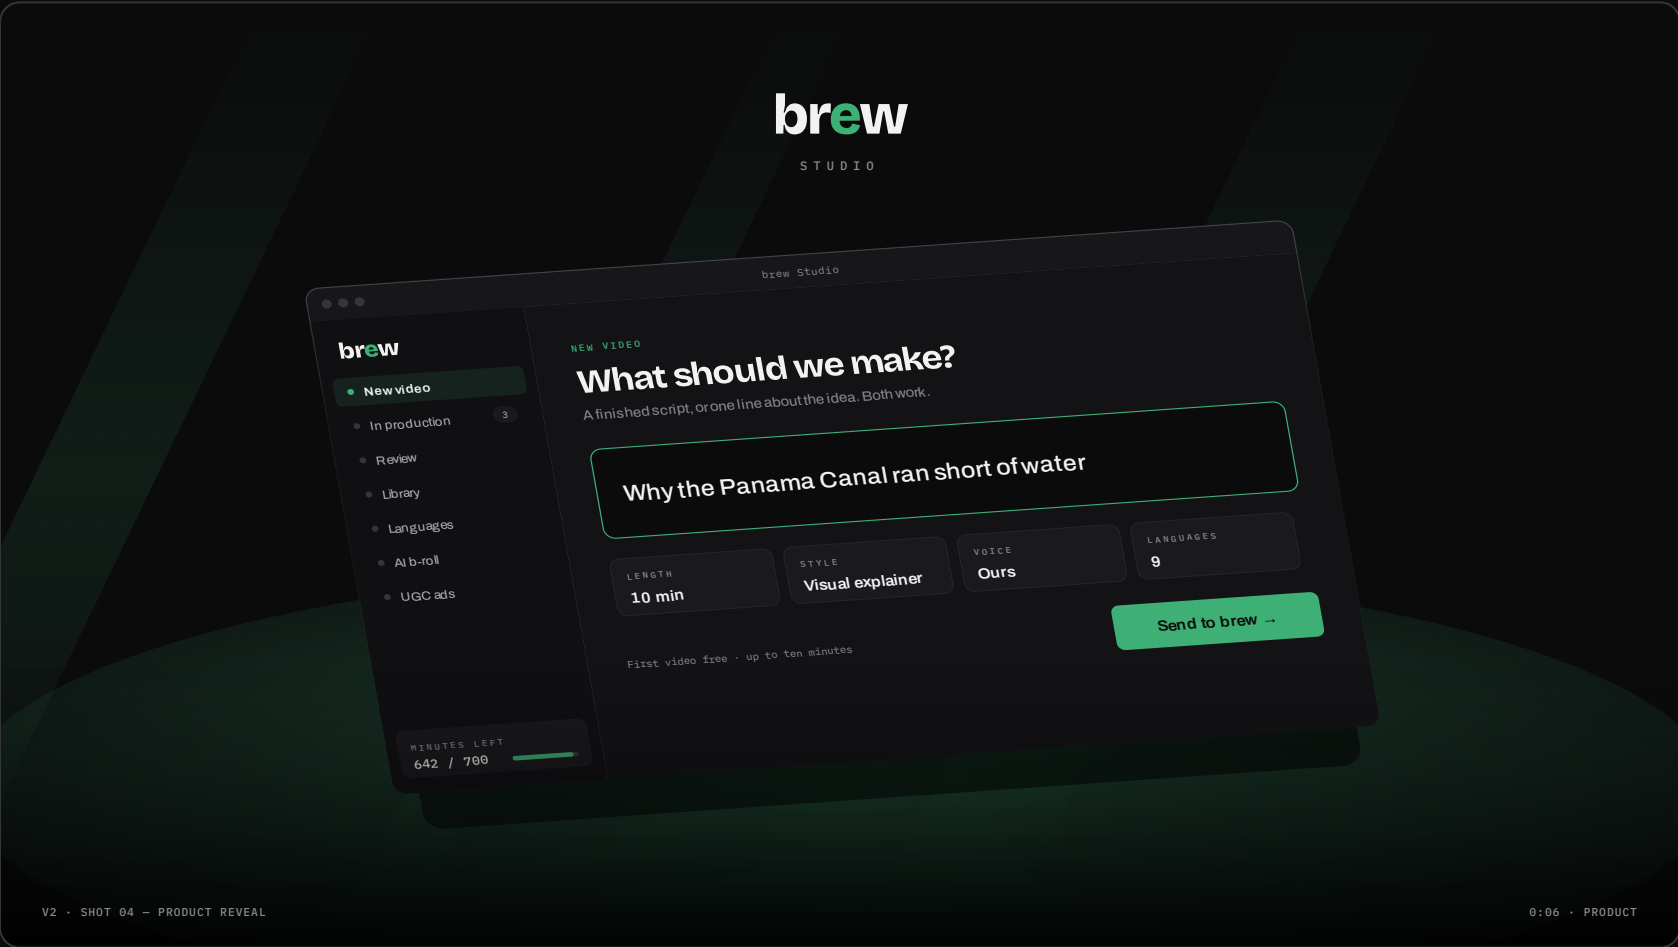

VISUAL	Full-bleed statement, white with a soft top-to-bottom gradient. Nothing else on screen.
CAMERA	Words cut on in time with kick drums (one word per beat), each with a 4px vertical settle. No fades.
VO	"You have the ideas."
SFX	Kick on each word.
NEXT	Cut to the counter-line.

03 Not the edit bay.

0:04 · Hook

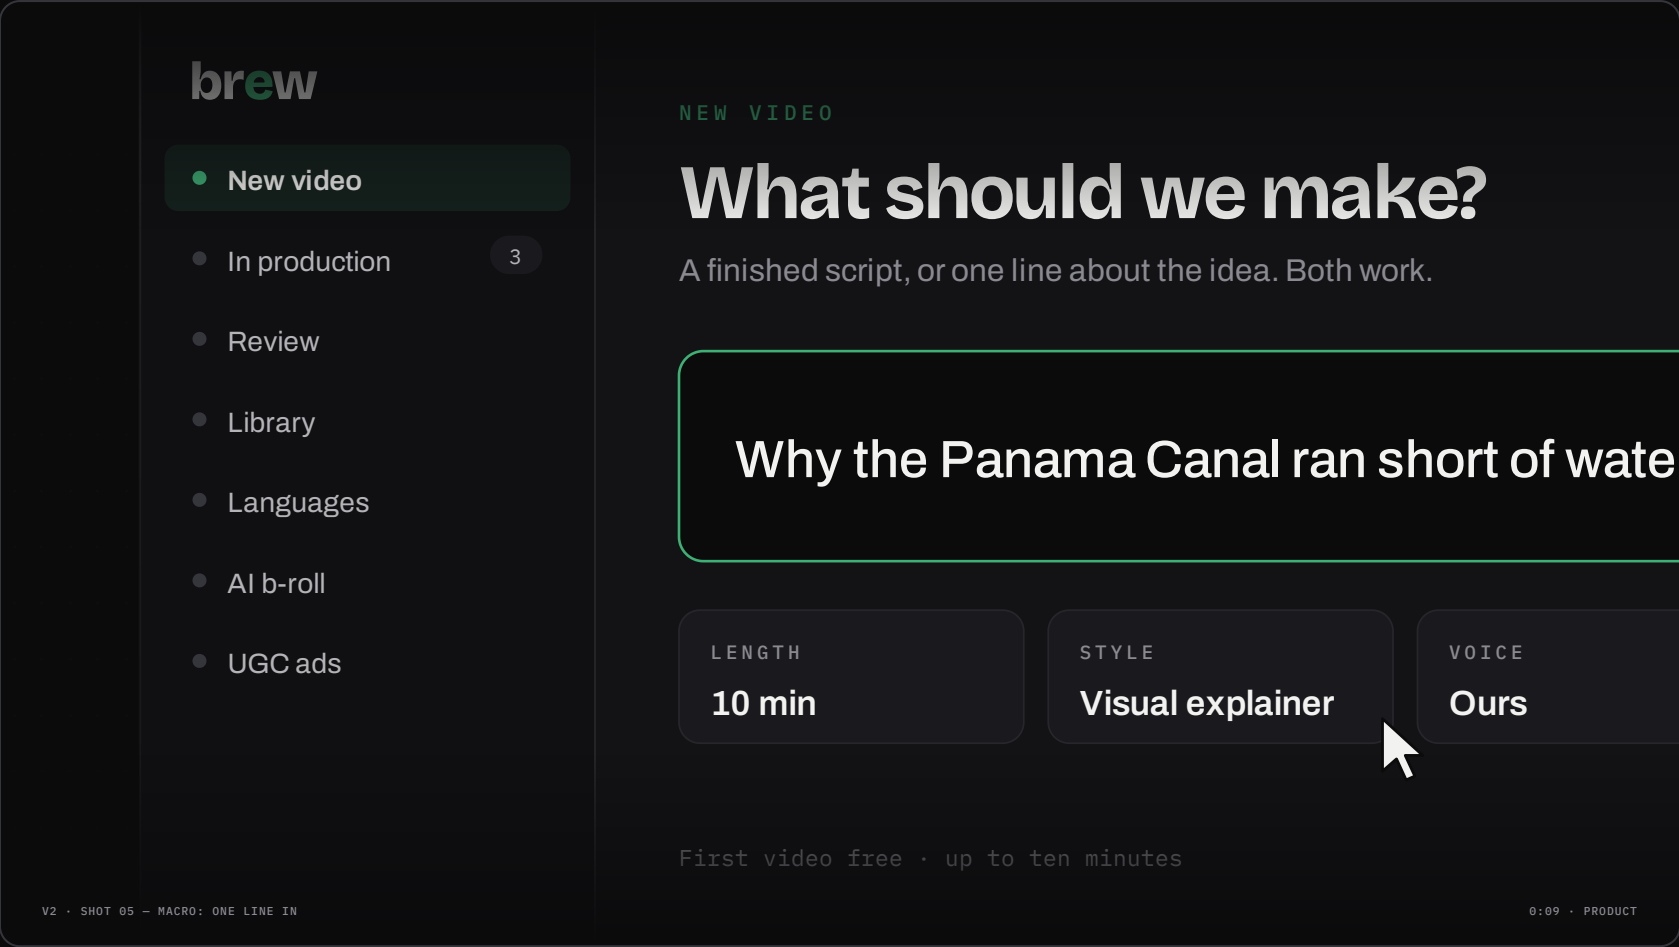

VISUAL	"Not the edit bay." in grey, with ghosted timeline tracks and a hundred tiny file chips stacked behind it at 6% opacity. The mess is texture, not content.
CAMERA	Background tracks drift left at different speeds (parallax). Statement holds still: the only calm thing on screen.
VO	"Not the edit bay."
SFX	A muffled pile of notification pings under the music, ducked.
NEXT	Lights drop to black; a green glow rises from below.

04 Product reveal

0:06 · Product

VISUAL	brew Studio rises out of darkness, tilted in perspective, lit from below by a green glow, with diagonal light beams raking across its glass edge. Floor reflection under the window.
CAMERA	Camera: low angle crane up, 20° → 8° tilt over 2.5s (ease in-out). Glass edge catches the beams as they pass. Logo resolves top-centre.
VO	"Meet brew."
SFX	Music opens up: pad + bass enter. Soft "air" swell into the logo tick.
NEXT	Push into the prompt field.

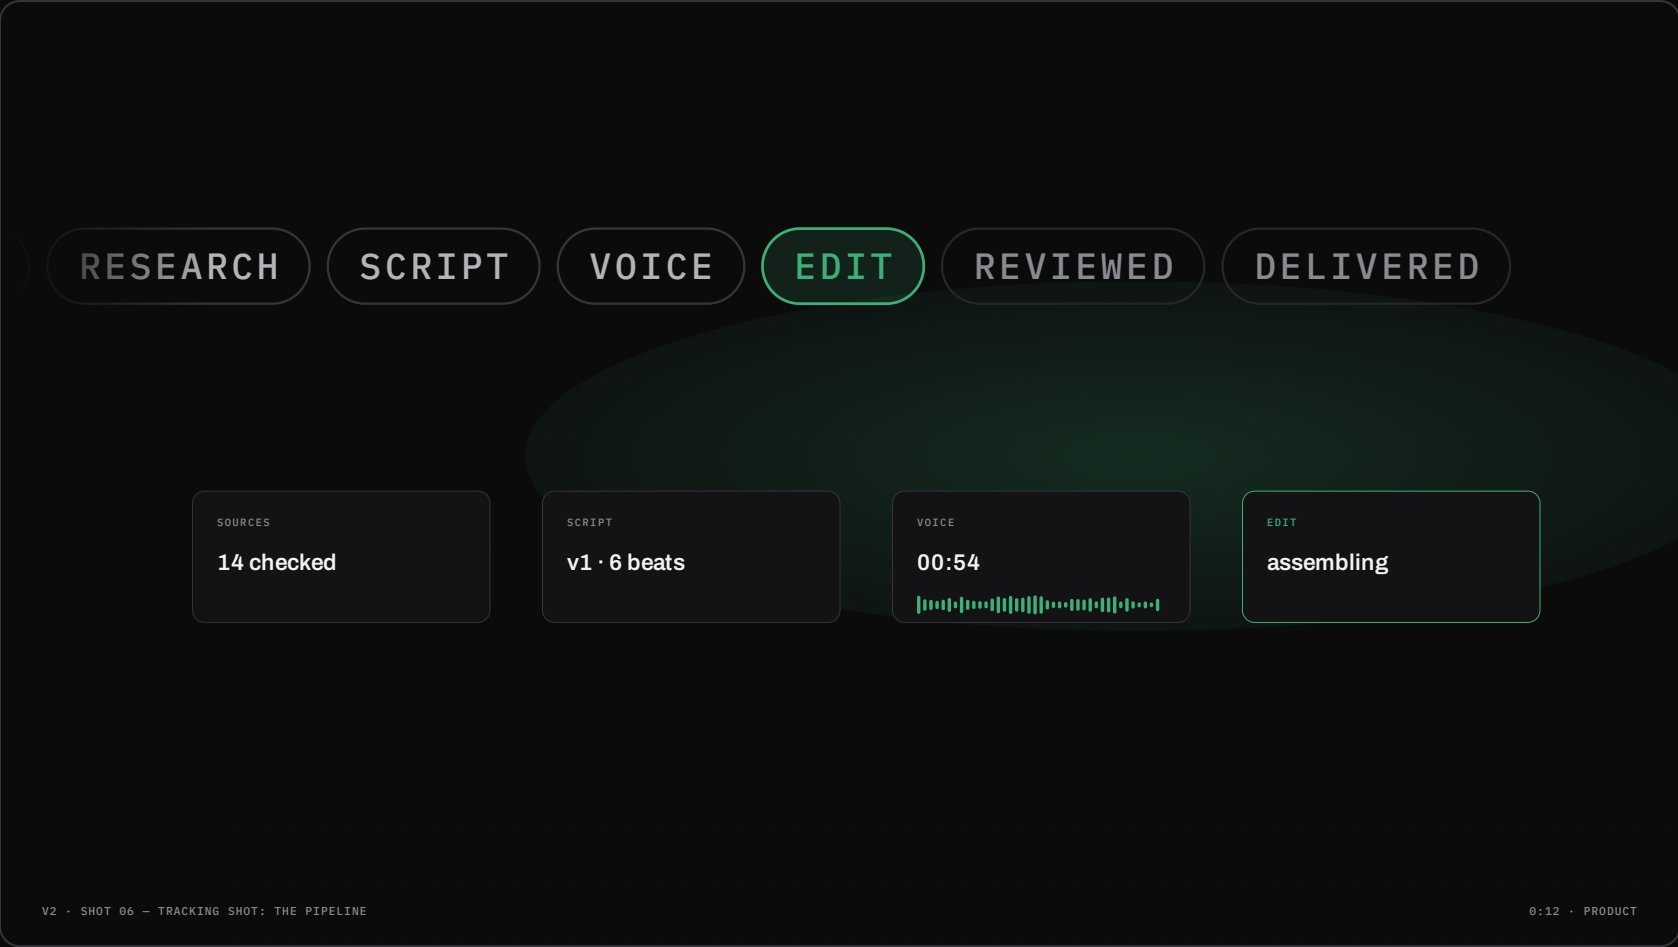

05

Macro: one line in

0:09 · Product

VISUAL	Macro on the prompt: "Why the Panama Canal ran short of water" being typed, the green caret, the Send to brew button in sharp focus while the rest of the UI melts into blur.
CAMERA	Rack focus from caret to button. Cursor glides in and clicks; button compresses 2px and the green spills outward as light.
V O	"Send a topic, or a script..."
SFX	Close-mic keyboard, one tick per character; tactile click.
NEXT	The button's light streaks right into the pipeline.

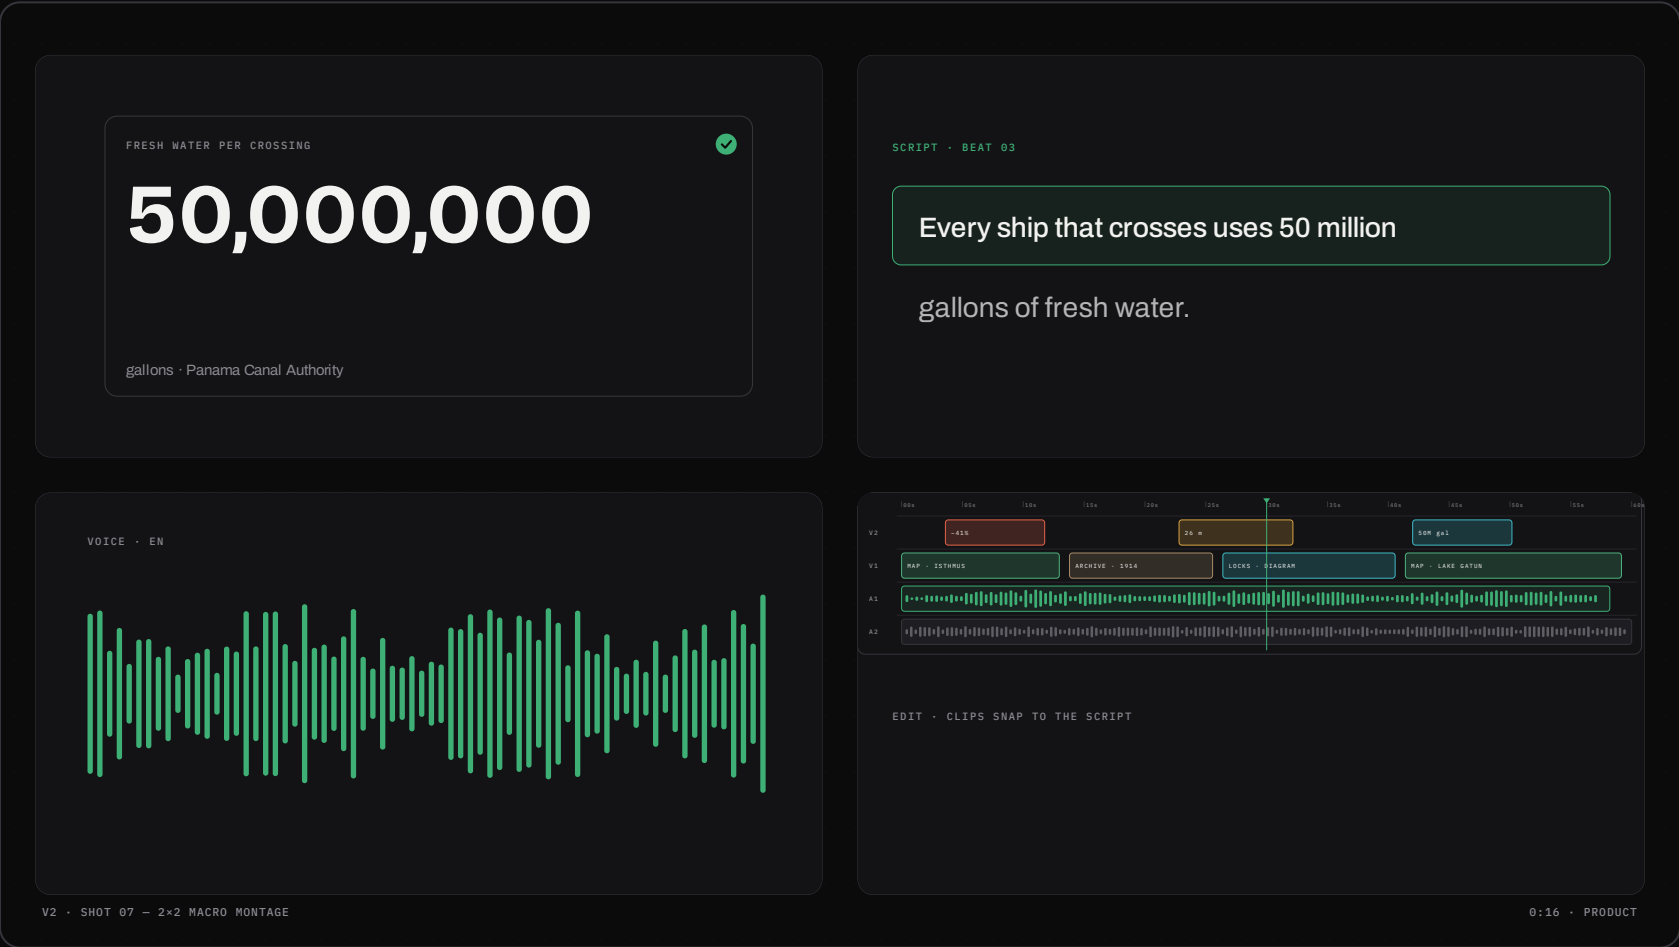

06

Tracking shot: the pipeline

0:12 · Product

VISUAL	The seven pipeline stages from the site, scaled up into a physical track. Camera tracks sideways along it; done stages dim, EDIT burns green. Beneath each stage a tiny artifact: sources, script, waveform, timeline.
CAMERA	Lateral dolly R → L at constant speed, 3s. Motion blur on the passing pills. Each stage lights on a hi-hat.
V O	"...we research it, write it, voice it, and cut it."
SFX	A rising arpeggio, one note per stage.
NEXT	Split into a 2×2 of macro shots.

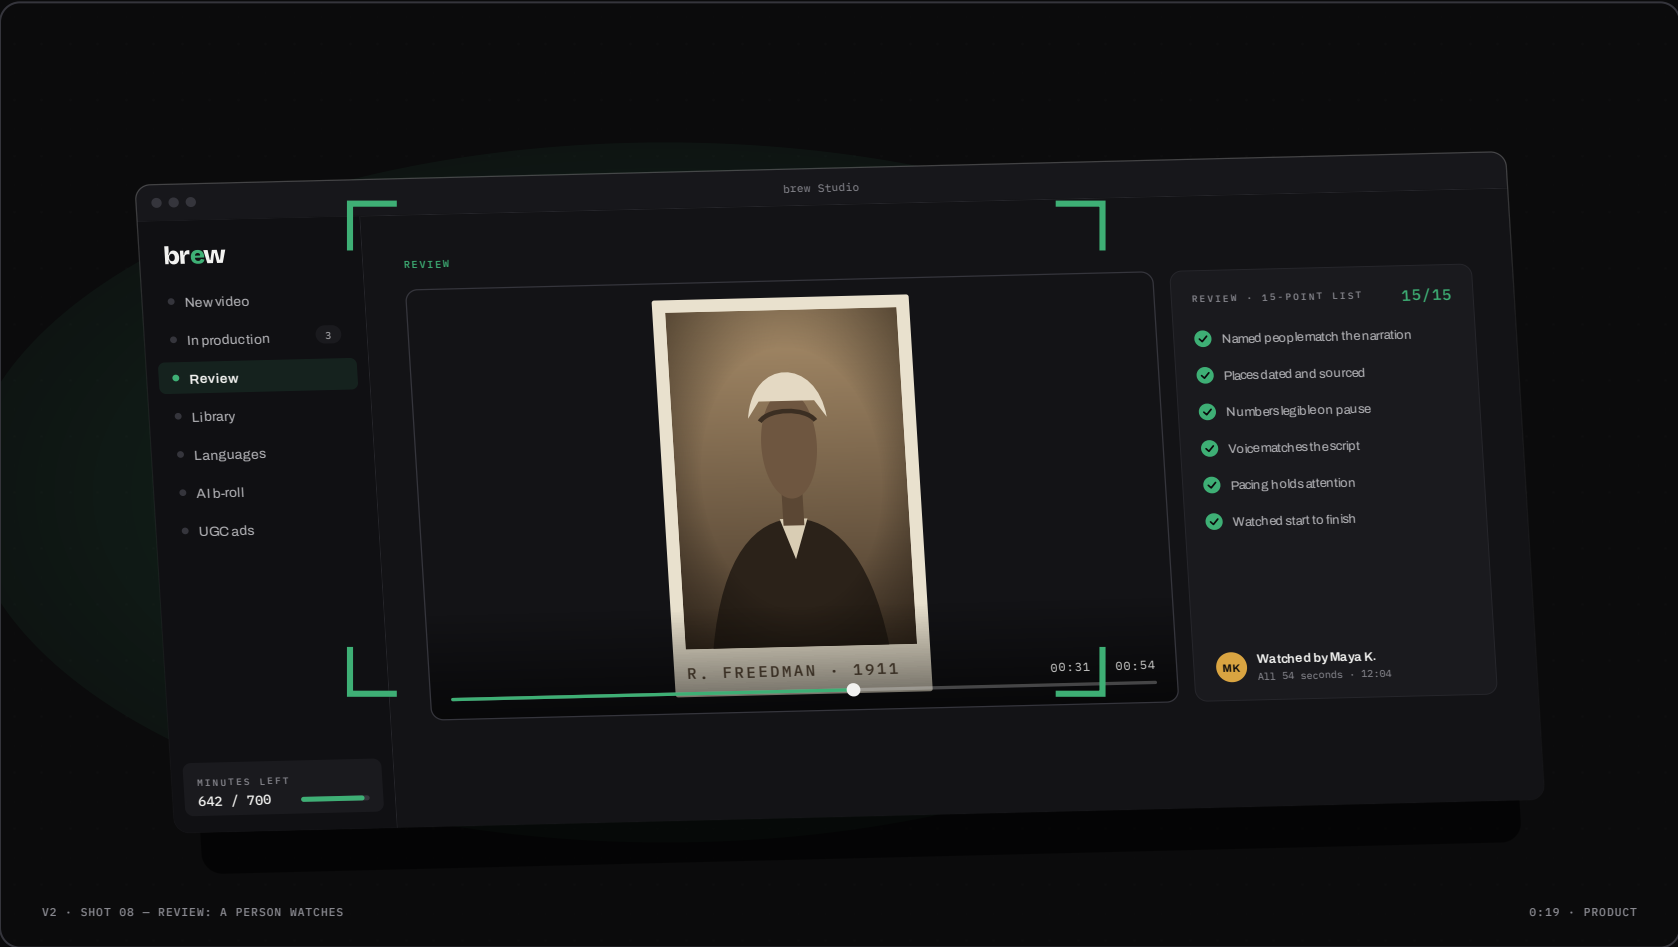

07

2×2 macro montage

0:16 · Product

VISUAL	Four macro tiles on the beat: a verified fact (50,000,000 gallons), a highlighted script line, the voice waveform, timeline clips snapping together.
CAMERA	Tiles cut in clockwise on four beats, then all four push in 4% together. Thin green hairlines between tiles.
V O	(music)
SFX	Four percussive UI clicks on the beats.
NEXT	Tiles collapse into the review player.

08

Review: a person watches

0:19 · Product

VISUAL	The review screen in hero light: Rose Freedman's 1911 photograph in the player, the 15-point checklist at 15/15, and the reviewer card "Watched by Maya K." The viewfinder brackets lock onto the player.
CAMERA	Music drops to a single pad. Slow 2s push in. Brackets snap with overshoot. Checklist ticks down in 60ms steps.
V O	"Then a person watches all of it."
SFX	Near silence, then soft ticks and one warm confirmation tone.
NEXT	Cut to black statement.

Watched by a person.

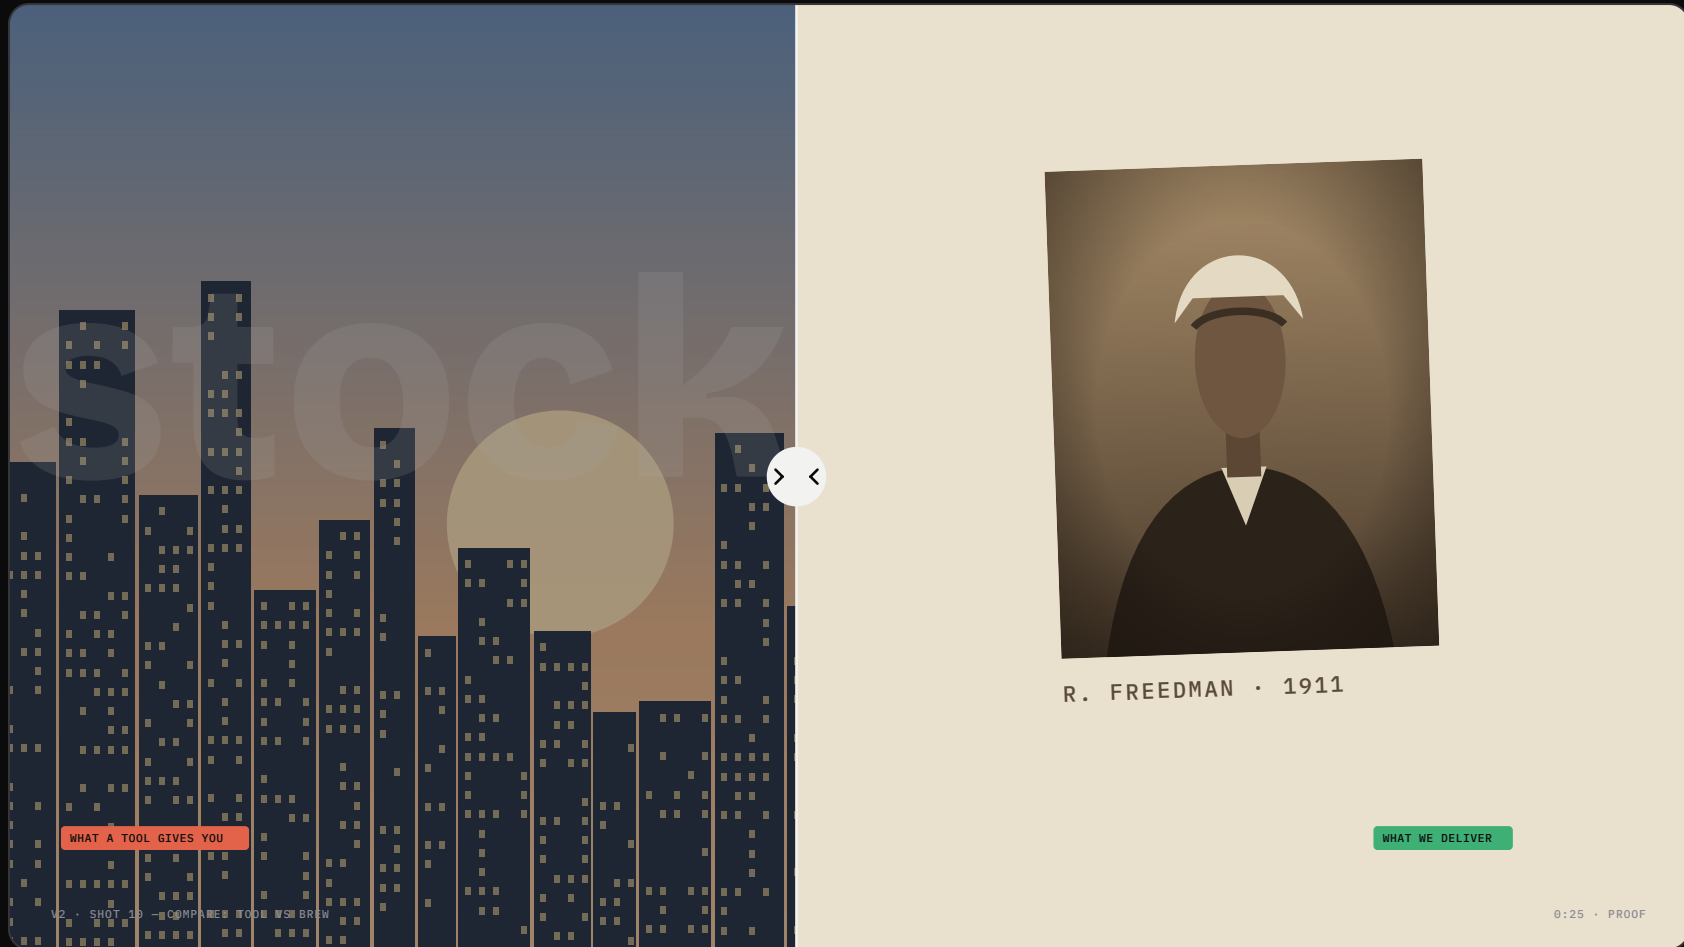

V2 · SHOT 09 — EVERY FRAME, WATCHED BY A PERSON.

0:22 · PROOF

09 Every frame. Watched by a person.

0:22 · Proof

VISUAL	Statement, two lines. "person." in brand green, held inside the brackets.
CAMERA	Line one cuts on; line two rises through a mask; brackets draw around "person." last.
VO	"Every frame. Before you ever see it."
SFX	The brew signature chord.
NEXT	Hard cut into the comparison.

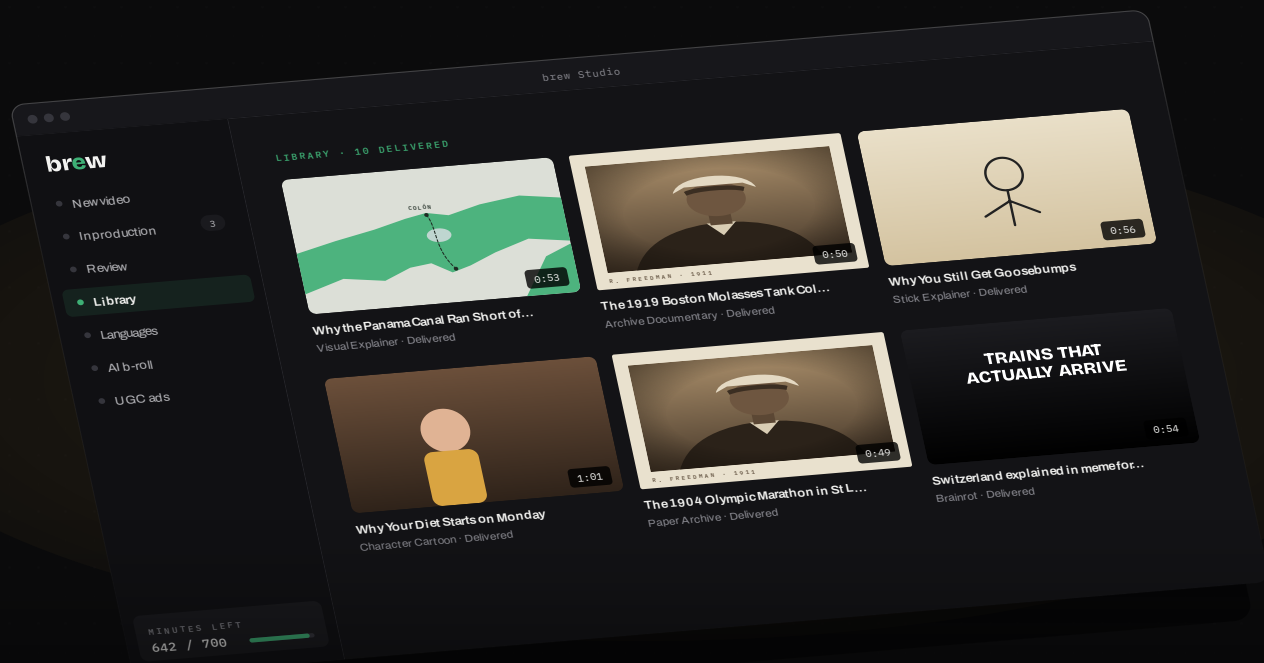

10 Compare: tool vs brew

0:25 · Proof

VISUAL	Full-bleed split with a draggable divider. Left: the stock skyline a tool picks when the narration says "Rose Freedman". Right: her actual 1911 photograph on paper. The divider sweeps across.
CAMERA	Divider wipes from right to left over 1.6s, revealing the archive photo. Left half desaturates as it shrinks.
VO	"An AI tool picks on mood. We find her."
SFX	Paper slide; shutter click when the divider settles.
NEXT	Pull back into the library.

WE RUN IT · YOUTUBE

V2 · SHOT 11 — LIBRARY GLIDE

0:28 · PROOF

11 Library glide

0:28 · Proof

VISUAL	The Library screen at a steep isometric angle: ten delivered films across nine styles (explainer, archive, stick, cartoon, brainrot). Thumbnails glow faintly.
CAMERA	Camera glides diagonally across the grid (crane + pan), 3s, parallax between window and glow. One card lifts on hover.
VO	"Long-form YouTube, any style, up to sixty minutes."
SFX	Smooth whoosh; soft card lift.
NEXT	Language dropdown opens in the same window.

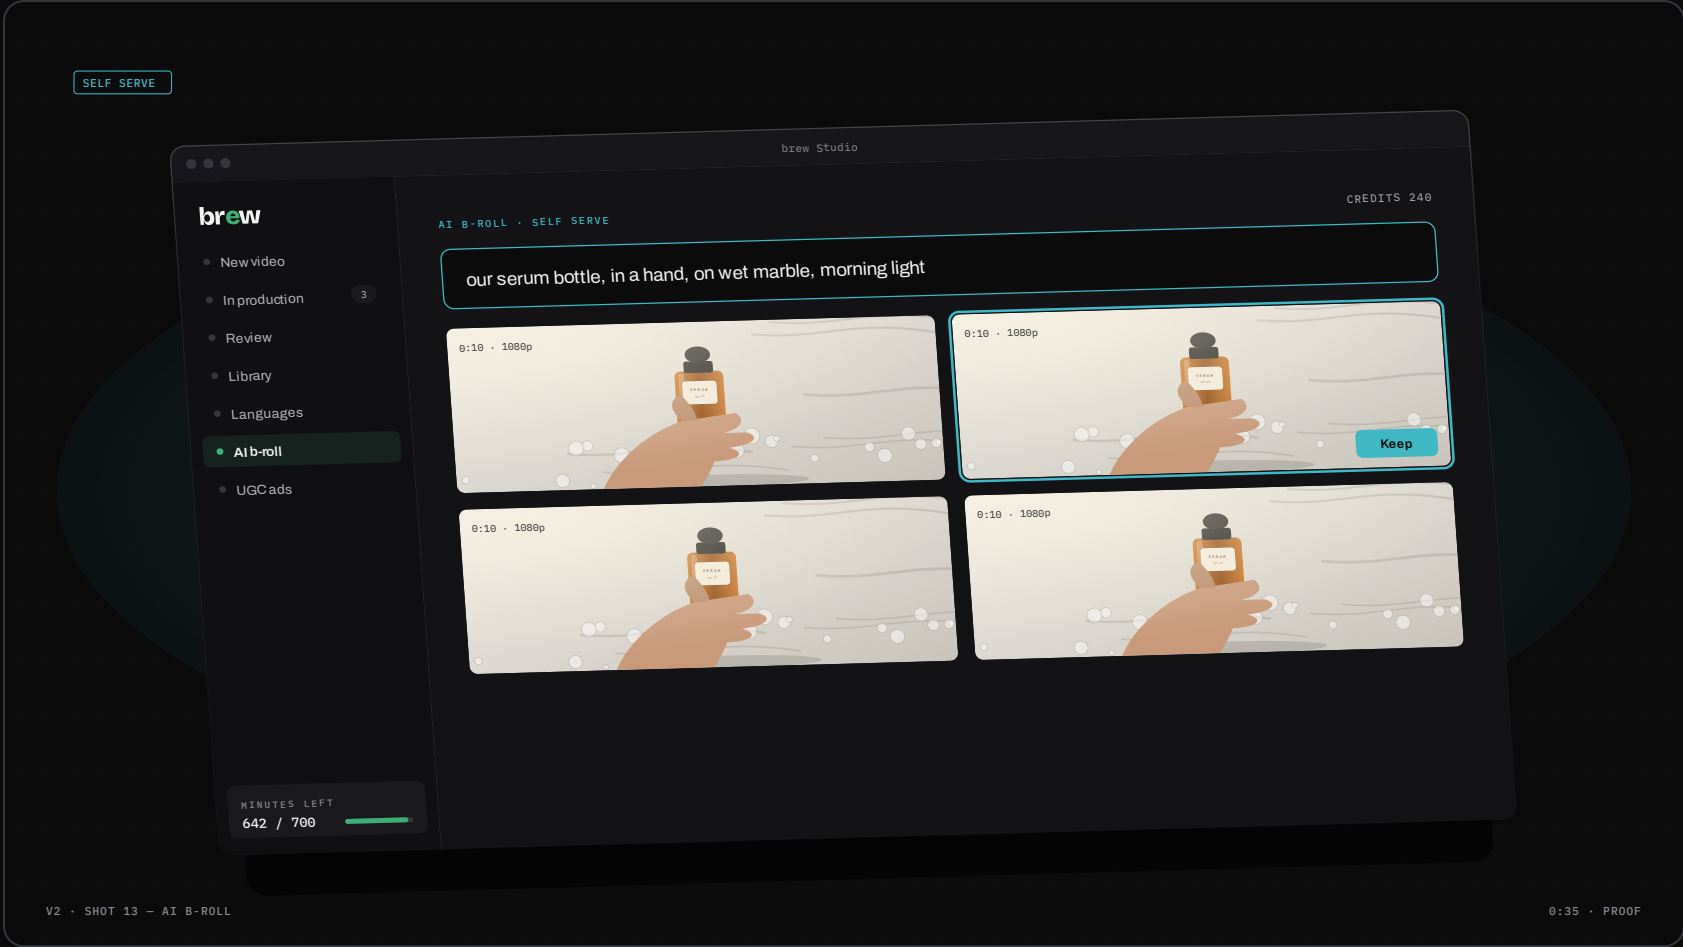

V2 · SHOT 12 — NINE LANGUAGES

0:32 · PROOF

12 Nine languages

0:32 · Proof

VISUAL	Languages screen: same player, a language list on the right (exactly the nine on the site). The selection steps EN → DE → FR while the waveform reshapes and the picture stays locked.
CAMERA	Selection highlight steps down on each beat. Waveform morphs per language. Small floating chip: "Upload it nine times, not once."
VO	"Upload it nine times, not once."
SFX	The same VO phrase, crossfading through languages.
NEXT	Window swaps to the teal b-roll screen (shared-element on the player).

13 AI b-roll

0:35 · Proof

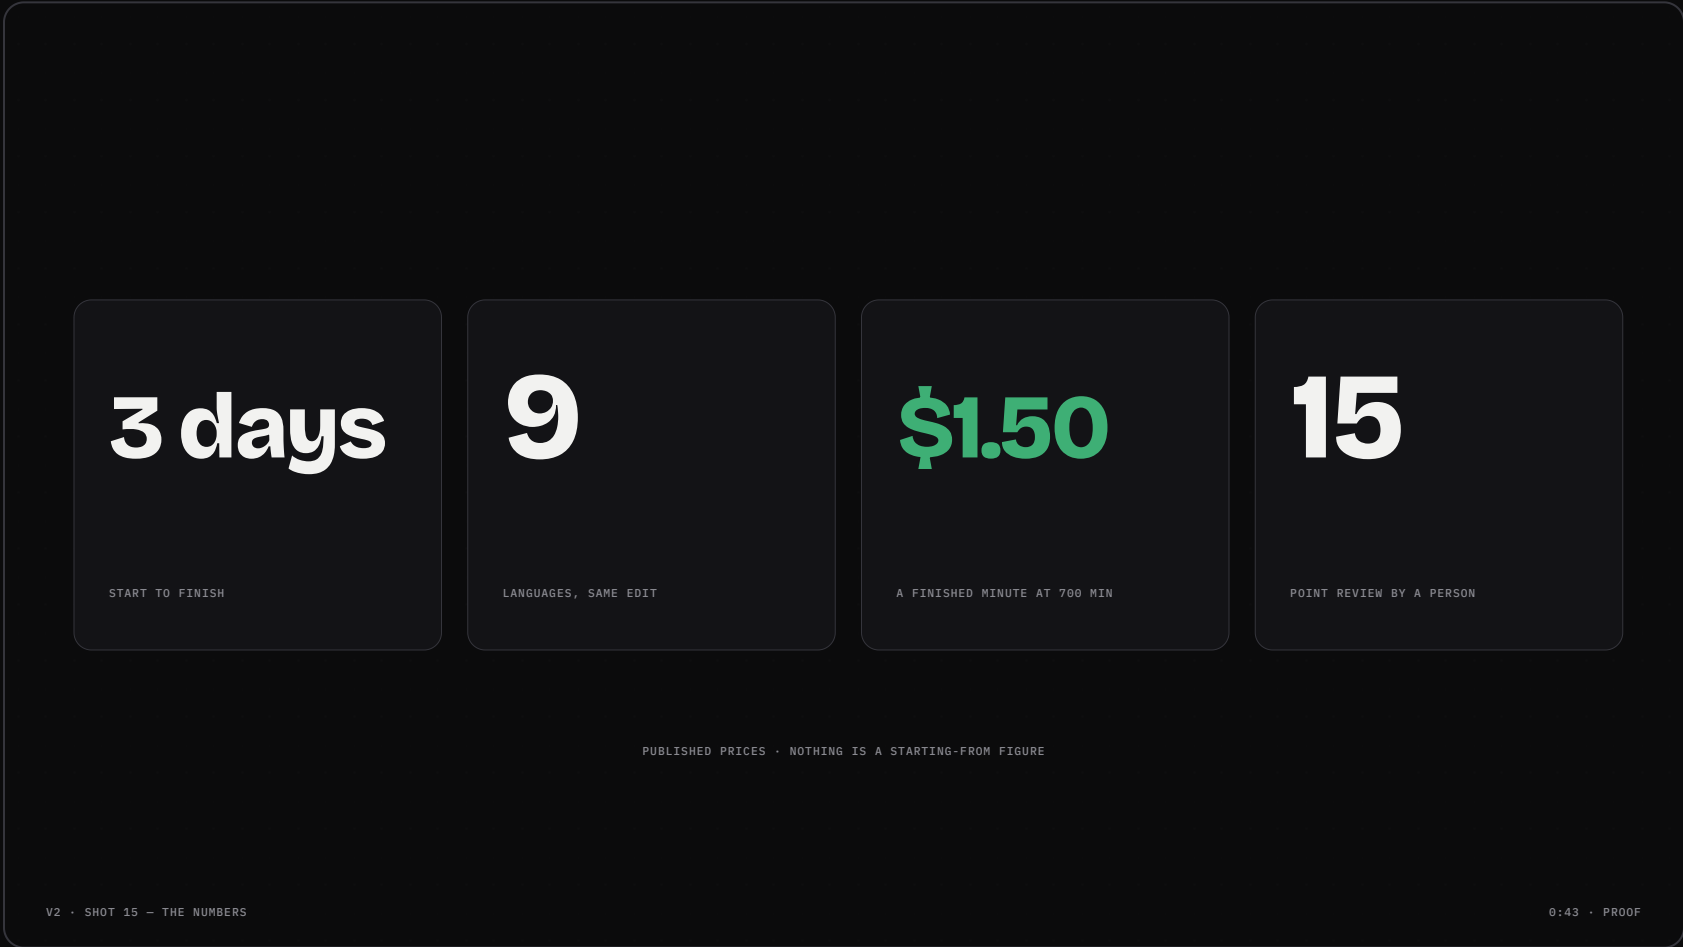

VISUAL	Teal-lit b-roll screen: the prompt "our serum bottle, in a hand, on wet marble" and four generated takes; one gets the Keep button.
CAMERA	Takes resolve in a 2×2 from noise to image (40ms stagger). Camera eases to the kept take, which expands to full-bleed on the cut.
V O	"Need a shot that doesn't exist? Type it."
SFX	Granular shimmer as the takes resolve; click on Keep.
NEXT	The kept take morphs into a vertical phone.

14 UGC carousel

0:39 · Proof

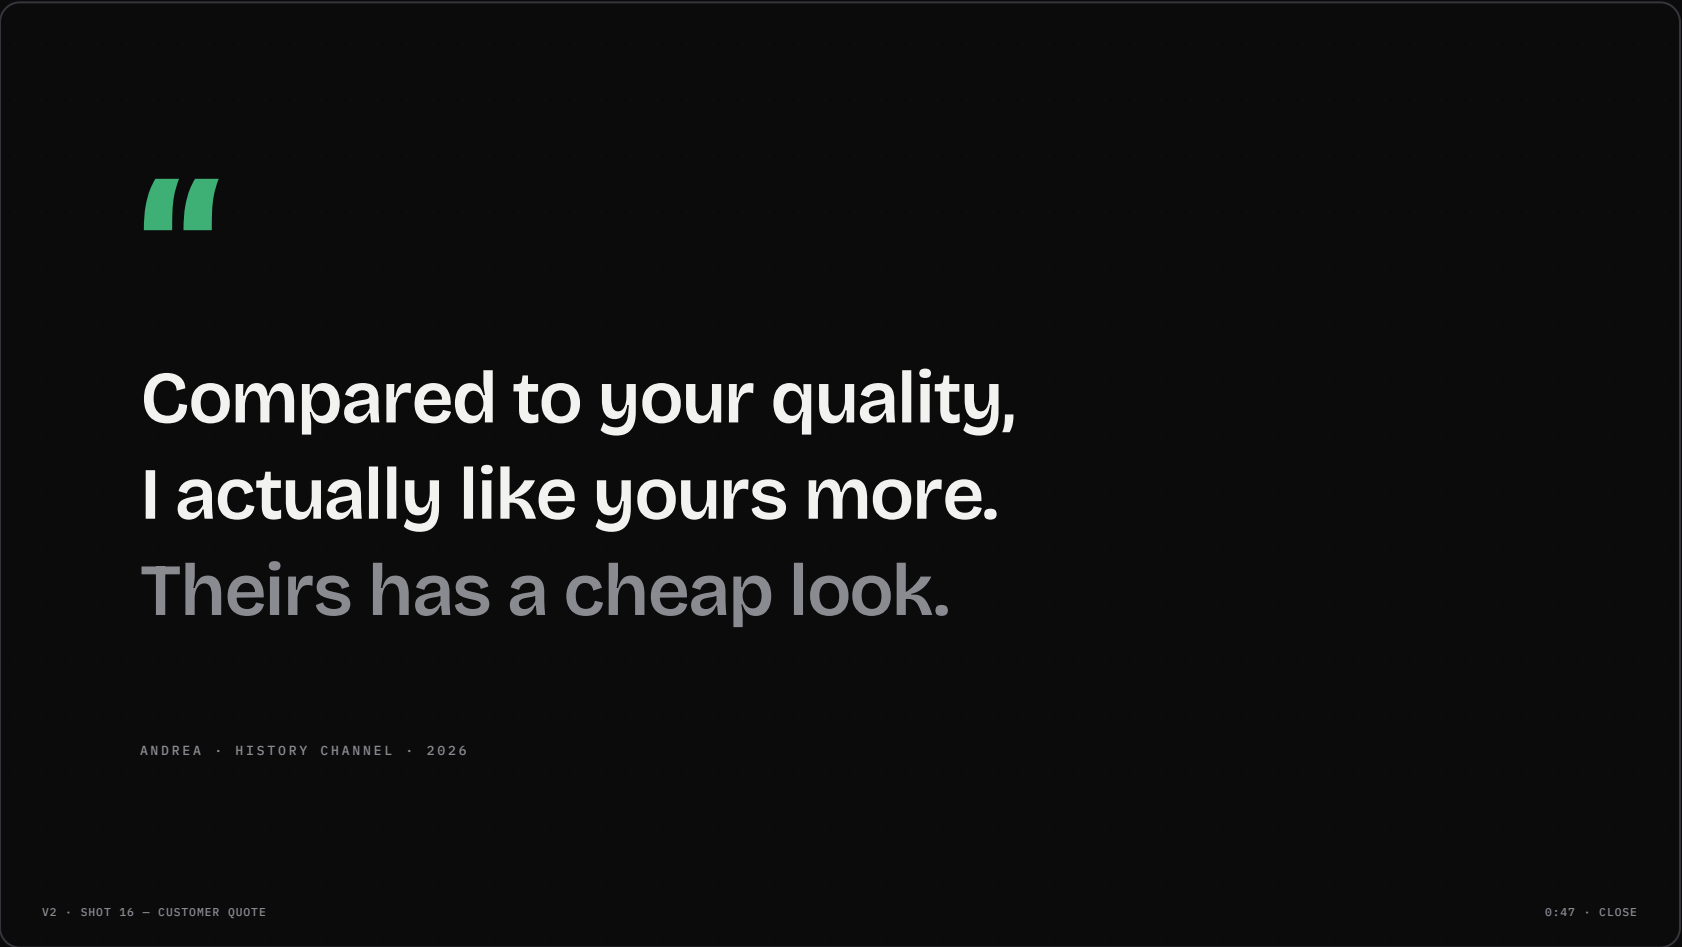

VISUAL	Five vertical ads on a curved carousel, coral rim light: centre phone sharp and large, sides smaller and dimmer. HOOK / DEMO / PAYOFF labels, on-screen AI-GENERATED tags.
CAMERA	Carousel rotates one step per beat (3 steps). Centre phone plays; captions highlight word by word.
V O	"Ads that look shot, not generated."
SFX	Three swipes, each a different voice snippet.
NEXT	Phones flatten into the stat row.

15 The numbers

0:43 · Proof

VISUAL	Four stat cards, each a single big number from the site: 3 days · 9 languages · \$1.50 a finished minute · 15-point review.
CAMERA	Numbers count up on four consecutive beats; cards rise 22px with 40ms stagger. Prices are the site's published figures (checked 20 Sep 2026).
V O	"Three days. Nine languages. One published price."
SFX	Mechanical counter ticks, a stamp per card.
NEXT	Fade to the customer quote.

16 Customer quote

0:47 · Close

VISUAL	The site's testimonial, set large: "Compared to your quality I actually like yours more. Theirs has a cheap look." Attribution in mono.
CAMERA	Quote types on by phrase, not character. Slow 2% push. Everything else black.
V O	(read by the customer, or left as text)
SFX	Music thins to pad + a single piano note.
NEXT	Cut to the payoff line.

17 You approve.

0:50 · Close

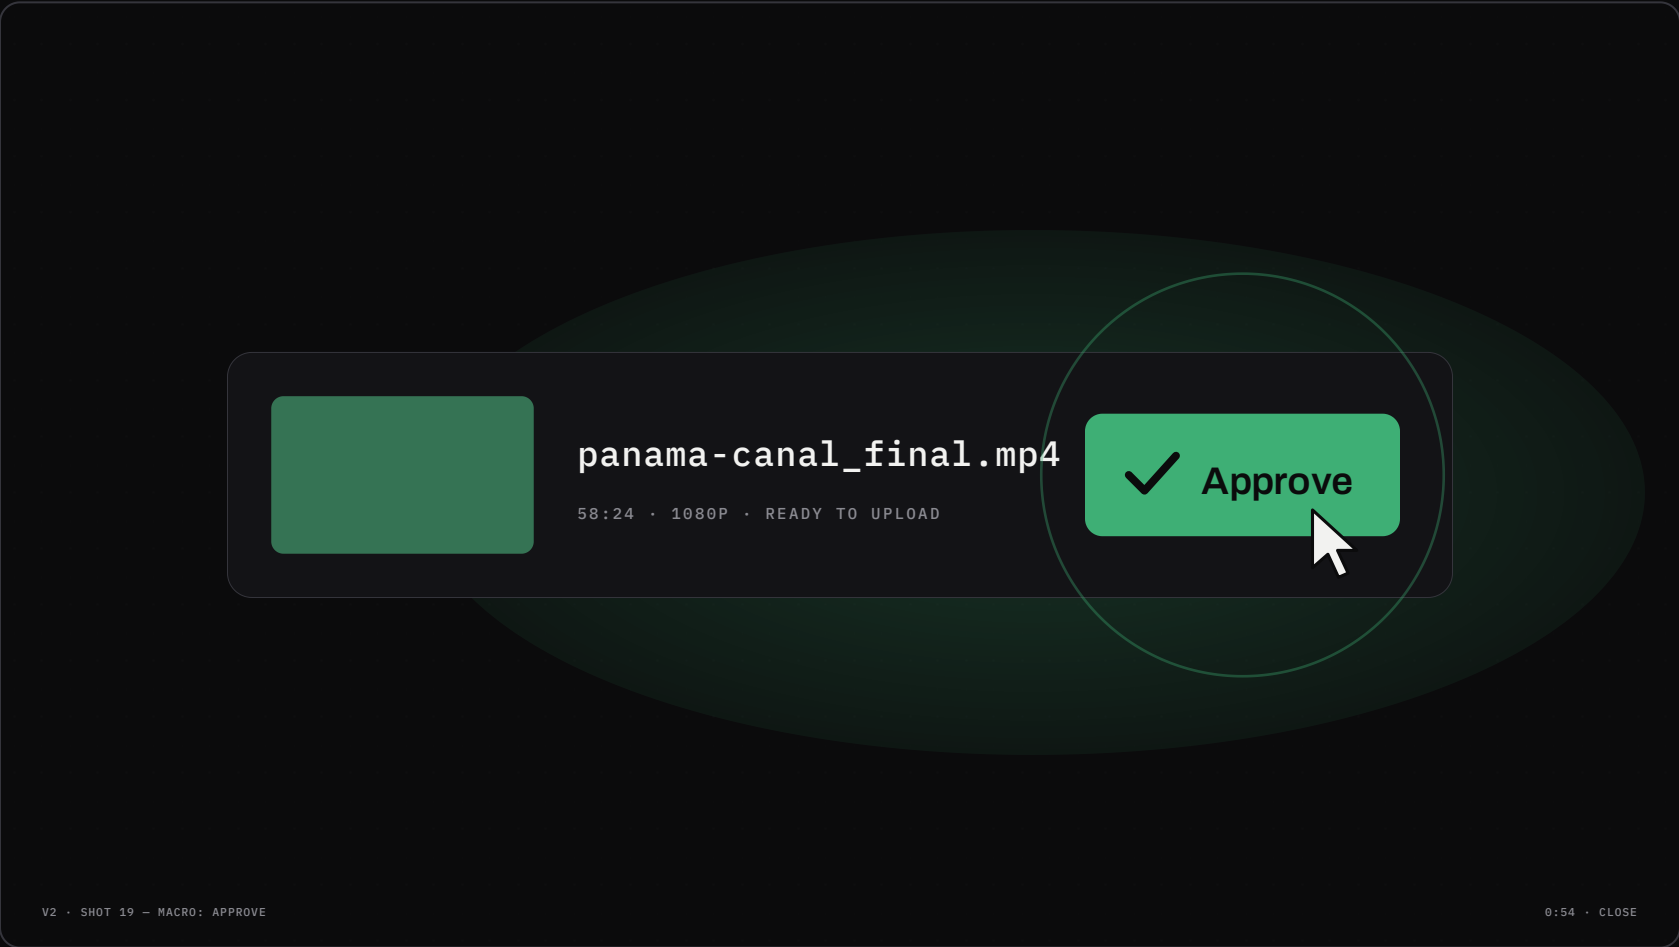

VISUAL	Statement, single line, massive.
CAMERA	Cuts on the downbeat. Hold 1.5s. The full stop pulses green once.
VO	"You approve."
SFX	Kick + clap.
NEXT	Hard cut to the second half.

18 You don't assemble.

0:52 · Close

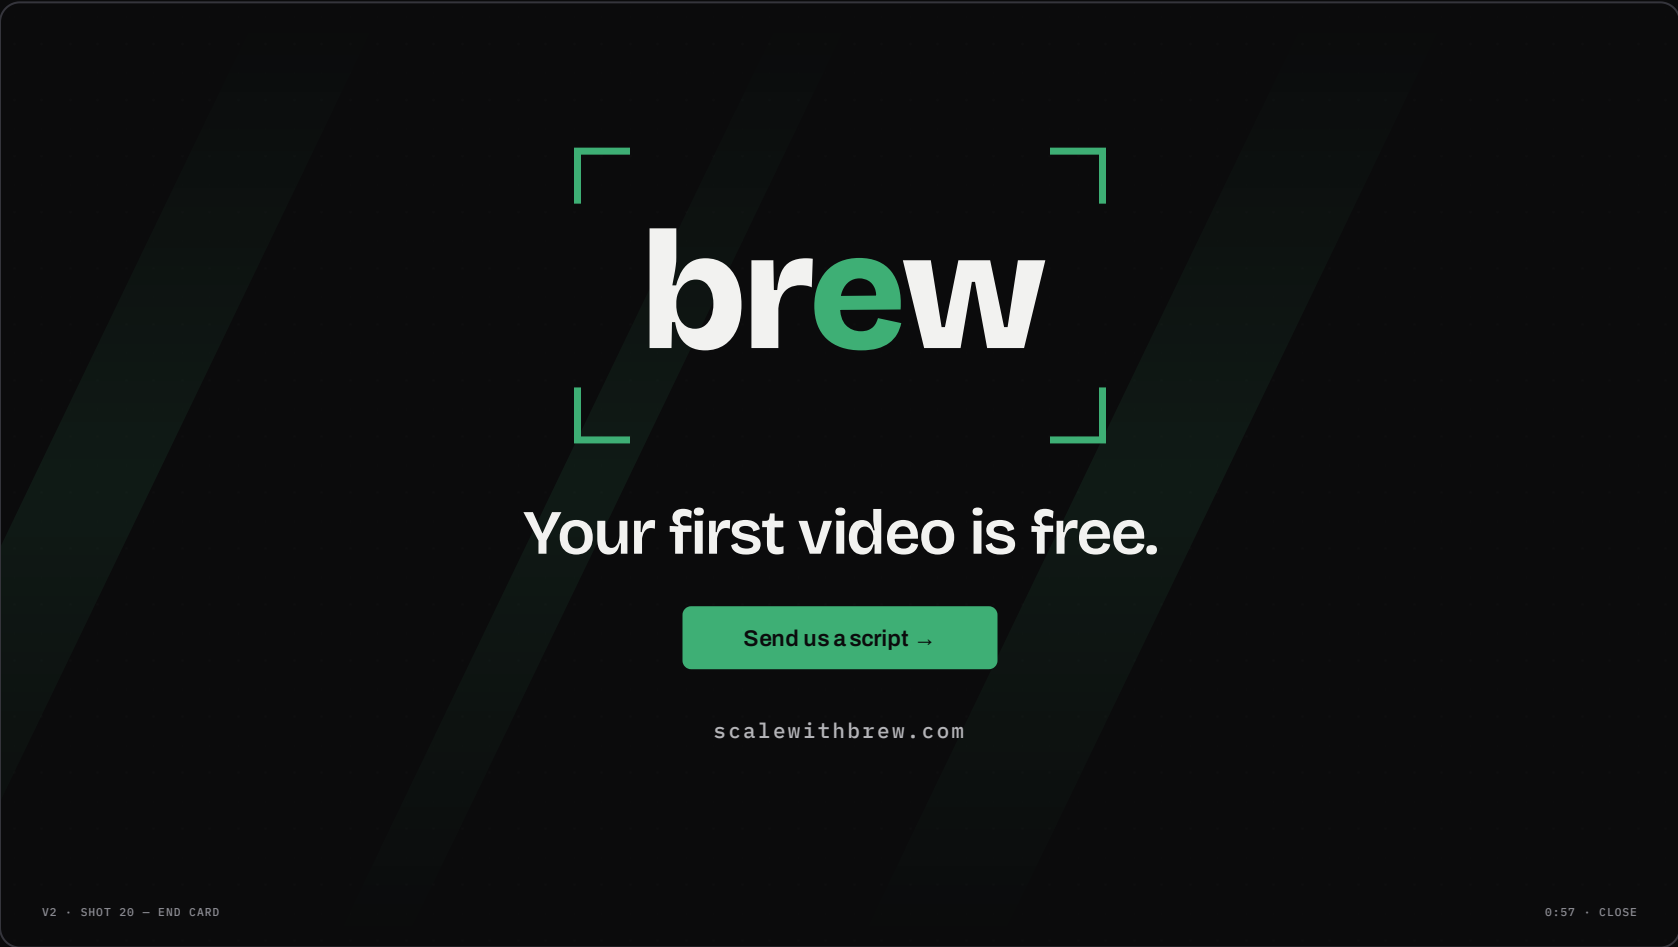

VISUAL	Statement in grey: "You don't assemble." The scattered UI fragments from the hook shot drift away behind it and dissolve.
CAMERA	Fragments fall out of frame with gravity; type stays.
VO	"You don't assemble."
SFX	Reverse cymbal into silence.
NEXT	Silence; a single button fades up.

19 Macro: Approve

0:54 · Close

VISUAL	Macro on the Approve button in brew Studio, cursor arriving. The finished file name sits beside it: panama-canal_final.mp4 · Ready to upload.
CAMERA	Rack focus from file name to button. Click. A green ring blooms out and becomes the end-card brackets.
VO	(silence, then the click)
SFX	One crisp click. The brew signature starts.
NEXT	Ring opens into the end card.

20 End card

0:57 · Close

VISUAL	brew logo in the viewfinder brackets. "Your first video is free." CTA button "Send us a script →". scalewithbrew.com. Light beams drift.
CAMERA	Brackets close in; logo letters rise; CTA button pops with overshoot. Hold 2.5s. Cut to black on the final note.
VO	"Your first video is free. brew."
SFX	Signature resolves; tail.
NEXT	Black.
